2105 Evaluation, Measurement and Verification Procedures and Standards

These regulations define the standards for evaluation, measurement and verification (EM&V) procedures as they are administered by the Energy Efficiency Advisory Council (EEAC). EM&V is a vital tool in creating consensus around the impact of current and future investments to reduce energy use and peak demand in Delaware. Results from EM&V are critical to the assessment of progress in meeting Delaware's energy efficiency and peak demand targets outlined in the Energy Efficiency Resource Standards Act, the State's "Lead by Example" policy, and the Delaware Sustainable Energy Utility's legislated goals. The results from EM&V provide valuable feedback to improve programs during implementation or suggest their cancellation, inform the development of new programs, and guide the allocation of resources.

The purpose of these EM&V regulations is to: develop an overall approach to the evaluation of energy efficiency and demand response programs in Delaware; standardize evaluation approaches for the assessment of energy efficiency and demand response programs; provide specific guidance to Program Administrators, contractors and stakeholders for the evaluation of energy efficiency and demand response programs; and ensure consistency between Program Administrators' energy efficiency evaluations plans, analysis, and reporting efforts.

The hearing record on the proposed regulations 2105 Evaluation, Measurement and Verification Procedures and Standards will be open August 1, 2016. Individuals may submit written comments regarding the proposed changes via e-mail to Lisa.Vest@state.de.us or via the USPS to Lisa Vest, Hearing Officer, DNREC, 89 Kings Highway, Dover, DE 19901 (302) 739-9042.
