101 DELACARE: Regulations for Early Care and Education and School-Age Centers

SUMMARY

The Office of Child Care Licensing (OCCL) proposes to amend Sections 4.0 and 60.1 of the DELACARE: Regulations for Early Care and Education and School-Age Centers to require each center to have a staff member on site at all times who is permitted to administer medications. Currently, Section 60.1 does not require an individual with a valid Administration of Medication certificate to be on site during all hours of operation. By amending these regulations, the needs of children requiring medication (with parent/guardian permission) while in child care will be met, consistent with the principals of the Americans with Disabilities Act.

COMMENTS

Interested parties wishing to offer comments, suggestions, data, briefs, or other materials concerning the proposed regulation may submit them to the Office of Child Care Licensing, Division of Family Services, Department of Services for Children, Youth and Their Families, 3411 Silverside Road, Hagley Building, Wilmington, Delaware, 19810, Attention: Kelly McDowell or email them to Kelly McDowell at Kelly.McDowell@state.de.us by the close of business on August 31, 2017.

- 28.4.2 If an early childhood administrator is responsible for two or more centers, each with capacities of 60 or fewer children, a staff member who meets the qualifications for the position of an early childhood administrator or early childhood curriculum coordinator shall be at each center at least 50% of the hours of operation.
- 28.5 A licensee shall follow a one-to-four ratio of early childhood teachers to early childhood assistant teachers, early childhood caregivers, early childhood interns, and early childhood aides as indicated in the table below during all hours of operation:

Number of Early Childhood Teacher(s)	Total Number of Early Childhood Assistants, Caregivers, Interns, and Aides
1	1 to 4

- 28.6 Staff charged with caring for children shall not be given other duties or participate in personal activities such as using a cell phone which would interfere with providing care to children. A licensee shall ensure that providing child care is the primary focus for all direct-care staff during the hours of operation and that supervision of each child is provided at all times.

29.0 Staff Communication

A licensee shall have and follow an organized system of documented communication among staff to ensure that a staff member assuming responsibility for a child or children, as during shift changes, for example, is informed of significant information, problems, needs, or special circumstances involving a child or children.

30.0 Ratios, Group Size, and Supervision

- 30.1 A licensee shall ensure that direct supervision of children is provided at all times through the assignment of qualified staff physically present and working with children to maintain the following minimum staff/child ratio and maximum group size for each age group listed during daily activities at the center as indicated in the table below:

	Age of Child	Minimum Staff/Child Ratio	Maximum Group Size
Infant	Under 12 months	1:4	8
Young toddler	12 through 23 months	1:6	12
Older toddler	24 through 35 months	1:8	16
Young preschool child	36 through 47 months	1:10	20
Older preschool child	48 months or older and not yet attending kindergarten or higher	1:12	24
School-age child	Attending kindergarten or higher	1:15 ¹	30

¹ A licensee may apply for a variance from the minimum staff/child ratio to a staff/child ratio of 1:20 when a currently certified State of Delaware teacher is teaching school-age children in the teacher's area of certification. The licensee must have and follow a plan to comply with the staff/child ratio of 1:15 when a certified teacher as described above is not present (such as during planned or unplanned absences, before and after care, etc.). A copy of the teacher's current certification and the licensee's plan for teacher absence must be submitted to OCCL with the Variance Request form. No variance from the maximum group size of 30 will be granted.

- 30.2 A licensee shall maintain the full staff/child ratio for infants at all times and a staff member shall be assigned to care for specific infants and toddlers within their group.
- 30.3 For mixed age groups, the staff/child ratio and group size requirements are those for the age of the youngest child present.

When the position of early childhood administrator or early childhood curriculum coordinator, if applicable, is vacant for 30 days or more, a substitute or person filling that role must be qualified for and function in the designated position.
- 31.3 Volunteers

- 31.3.1 Volunteers without a complete personnel file may not be alone with children and must always be supervised by at least the designated early childhood teacher or designated school-age site assistant who has been assigned responsibility for the early care and education or school-age center. Portable space heaters shall be prohibited. For a center licensed after January 1, 2007, air conditioning shall be used during hot weather to keep rooms used by children at a comfortable temperature. Except as provided below, a center shall be required to inform the OCCL and close temporarily if the minimum or maximum room temperature cannot be maintained. If room temperature is above 60° F and below 90° F, a center shall restore room temperature to above 68° F and below 82° F within the next 4 hours.

37.0 Smoking Prohibited

A licensee shall inform staff members and others at the facility that smoking is prohibited at all times anywhere inside the center, in the outdoor play area, while transporting children, and in the presence of children during field trips or routine program outings sponsored by the center.

- 38.1 A center shall have sufficient natural and artificial lighting to allow for the supervision of the children and provide illumination of at least 30 foot candles at floor level in areas where children's activities occur.
- 38.2 A licensee shall ensure that interior space designated for the use of children is available to children when the center is in operation and is arranged to allow each child adequate space for free movement and active play. A center shall have at least 35 square feet for each child in each area or room used by children. Measurements shall be from wall to wall on the inside. Toilet rooms, kitchen areas, isolation areas for ill children, offices, storage spaces, hallways, furnace rooms, gymnasiums, and other areas not used as classroom space shall not be counted in determining a center's capacity.

- 39.3 The child's individual needs for rest, comfort, food, drink, and activity shall be met until the child can be picked up by a parent/guardian or it is determined by a health care provider/consultant that the illness or symptoms pose no serious health risk to the child or to other children.
- 39.4 All items used by an ill child, including rest equipment, bedding, utensils, and toys shall be cleaned with soap and water and disinfected before being used by another child.

40.0 Outdoor Climate and Space

- 40.1 Weather permitting, a licensee is required to provide daily opportunities for outdoor play when the wind chill factor is 32°F or higher or the heat index is 89°F or lower and the weather and environmental conditions do not pose a significant health or safety risk. Outdoor play during periods outside this temperature range shall be at the discretion of the provider, unless the National Weather Service (www.weather.gov) has issued an advisory regarding health or safety risks for the local area. Children shall be appropriately dressed for the weather.

The outdoor play area shall be large enough to accommodate at least 1/4 of the licensed capacity of the center at one time. If the capacity of a center licensed before the effective date of the January 1, 2007, regulations increases, the licensee shall be required to ensure that the outdoor play area is in compliance with these regulations.
- 40.5 A licensee shall ensure that the outdoor play area is situated adjacent to or within close proximity to the center, is available daily to the children by a safe route, and has a shaded rest area for children. Staff shall inspect outdoor areas before children begin to play to ensure there are no hazards present and play equipment is safe for use. Outdoor sandboxes or play areas containing sand shall be maintained in a safe and sanitary manner including being covered when not in use. Use of trampolines is prohibited.
- 40.6 A licensee shall ensure that the center's outdoor play areas are fenced. Use of parks or other off-site play areas that are not fenced and used to comply with the outdoor space regulations requires OCCL approval. Fencing shall be sturdy, safe, and reinforced at intervals so as to give support, constructed to discourage climbing, and not prevent observation of children by staff and shall be a minimum of four feet in height with openings no larger than 3½ inches. Fenced areas shall have at least two exits, with at least one being remote from the building. Gates shall be equipped with self-closing and positive self-latching closure mechanisms. The latch or securing device shall be high enough or of a type that small children cannot open it.
- 40.7 For a center licensed before the effective date of the January 1, 2007, regulations, the existing fencing shall be acceptable as long as it is safe, free from hazards, and in good repair. When the fencing is replaced, the new fencing shall fully comply with these regulations.
- 40.8 A licensee shall ensure that the protective surface of the outdoor play area beneath and in the fall zones of climbing equipment, slides, swings, and similar equipment is of approved resilient material which absorbs falls. The fall zone depth and materials shall follow the instructions as listed in the most recent publication of the U.S. Consumer Product Safety Commission's or CPSC *Handbook for Public Playground Safety* regarding critical heights of tested materials (see CPSC website at <http://www.cpsc.gov/cpscpub/pubs/325.pdf>). All materials used for protective surfaces shall be of a size that prevents choking and all surfaces of the outdoor play area shall be made of materials that do not present a safety or choking hazard. Only pea gravel shall be acceptable as cover for the outdoor play area if using a gravel or stone-like surfacing. Protective surfaces of the fall zone shall extend at least six feet in all directions from the equipment. For swings, the protective surfacing shall extend, in back and front, twice the height of the suspending bar unless otherwise directed by the CPSC or other recognized authority on playground safety.

Inches	Type of Material	Protects to Fall Height
6	Shredded/recycled rubber	10 feet
9	Sand	4 feet
9	Pea gravel	5 feet
9	Wood mulch	7 feet
9	Wood chips	10 feet
Poured-in-place surfacing or rubber mats designed for outdoor use, if used, must be in the required fall zone and at a sufficient depth or thickness as required by manufacturer's specifications or other approved entity.		

- 40.9 Outdoor play equipment must be securely anchored unless portable by design, in good repair, and placed with regard for safe use and include equipment for vigorous play and large muscle activity with attention to the needs of the diversity of children served and their abilities to participate.
- 40.10 When a licensee can demonstrate that the outdoor space regulation cannot be met, the licensee shall provide at the site of the center, in addition to the indoor space required by these regulations, a minimum of 700 square feet of open, accessible indoor play space for large muscle activity. The licensee shall have and follow a written plan approved by the OCCL which specifies how large muscle activity will be provided.
- 40.11 For a center licensed before the January 1, 2007, regulations, the indoor space as indicated in these regulations may be at a nearby facility that was previously used and approved by the OCCL unless the capacity of the center increases or the physical plant of the center changes, allowing room for an indoor play space.
- 40.12 A licensee shall ensure that a roof-top or elevated play space above the first floor is protected by a non-climbable, secure, and hazard-free barrier that is at least seven feet in height.

41.0 Riding Toys

A licensee shall ensure that bicycles, tricycles, scooters, and other riding toys are the size appropriate for a child. These riding toys shall be in good condition, free of sharp edges or protrusions that may injure a child, and not motorized. All children over one year of age shall wear approved safety helmets while riding bicycles and while riding toys with wheels of 20 or more inches in diameter (such as tricycles), or using wheeled equipment (roller blades, skateboards, etc.), and while standing on and using scooters with handles. Helmets shall not be shared unless cleaned between users by wiping the lining with a damp cloth to remove head lice, nits, or fungal spores. Helmets shall be removed as soon as children stop riding helmet-required equipment.

42.0 Sleeping Accommodations

- 42.1 A licensee shall ensure that the program provides physical care routines including opportunities for rest/sleep for each child in attendance appropriate to each child's individual physical needs. Rest or sleeping equipment shall meet the safety standards required by the U.S. Consumer Product Safety Commission or other recognized authority approved by the OCCL and maintained in a safe condition. The rest area shall be lighted enough to allow for visual supervision. An alternative quiet activity shall be provided for those children who have rested or slept for 30 minutes and do not seem to need or want additional rest or sleep.
- 42.2 A licensee shall ensure that each child, except school-age children who do not sleep at the center, has clean, safe, age-appropriate individual rest equipment such as a crib, playpen, pack-and-play (without ripped mesh), cot, bed, or mat and permitted bedding. A child's rest equipment shall be labeled with the child's name or assigned chart number and used only by that child while attending the program. Chart numbers and assignments shall be documented, kept current, and available for review.
 - 42.2.1 Mattresses and sleeping equipment shall be covered with non-absorbent, cleanable coverings. Seasonably-appropriate top and bottom coverings, such as sheets and blankets, shall be provided for each child over the age of one year. Sheets and blankets or other bedding shall be cleaned at least weekly and when soiled or wet. A tight-fitting bottom mattress sheet is required for infants.
 - 42.2.2 Cots, mats, and crib mattresses shall be cleaned with soap and water and sanitized at least weekly and when soiled or wet. Rest equipment and bedding shall be cleaned and sanitized before being assigned to another child. Sleeping mats shall be stored so there is no contact with the sleeping surface of another mat or disinfected after each use.
 - 42.2.3 Each child under 18 months of age and not walking shall sleep in a crib, playpen, or pack-and-play. A child who is between 12 and 18 months of age and is walking may sleep on a cot, bed, or mat and permitted bedding with written permission from the child's parent/guardian.
- 42.3 A licensee shall ensure that cribs and other rest equipment are placed at least 1½ feet apart while in use.
- 42.4 Safe Sleep Practices for Infants and Sudden Infant Death Syndrome or SIDS/Suffocation Risk Reduction
 - 42.4.1 Cribs must meet the current standards of the U.S. Consumer Product Safety Commission or other safety authority recognized by the OCCL.
 - 42.4.2 Cribs shall not be stacked while in use.
 - 42.4.3 Crib mattresses shall be firm and tight-fitting with a tight-fitting bottom sheet only. Pillows, bibs, blankets, bumper pads, cloth diapers other than those worn by an infant, comforters, flat sheets, quilts, sheepskin, sleep positioning devices (except as described in subsection 42.5), stuffed toys, top sheets, and other items (except a pacifier, if used) are prohibited in a crib. Toys or objects attached to sleeping or rest equipment are prohibited.
 - 42.4.4 Soft surfaces such as soft mattresses, pillows, sofas, and waterbeds are prohibited as infant sleeping surfaces.
 - 42.4.5 Swaddling of infants requires written parent/guardian consent. The use of blankets for swaddling shall not be used when laying an infant down to sleep; swaddle-blanket sleepers may be used.
- 42.5 Infants shall sleep only in cribs, playpens, or pack-and-plays and be placed on their backs when laid down to sleep or in accordance with the recommendations of the American Academy of Pediatrics. An exception may be granted if the infant's health care provider documents in writing that the infant's physical or medical condition requires an alternative sleeping position or use of a sleep-positioning device. The health care provider must stipulate the specific sleeping position in which that infant must be placed or stipulate the sleep-positioning device and how it shall be used.

43.0 Toilet Facilities

- 43.1 A licensee shall ensure that a center has enclosed toilet rooms inside the building on each floor where child care has been approved. Each toilet room shall have at least one sink with warm running water and one

operable window or ventilation fan. All door locks, if present, must be designed to permit staff to open the locked door readily.

- 43.2 A licensee shall ensure that a center serving toddlers, preschool, and school-age children has at least the number of toilets and sinks in the following ratios:

Ages of Children	Ratio of Number of Toilets to Number of Children ^{1, 2}
24 Months through preschool	1:10
School-age	1:25
