The supervisor may assign to a competent occupational therapy assistant the administration of standardized tests, the performance of activities of daily living evaluations and other elements of patient/client evaluation and reevaluation that do not require the professional judgment and skill of an occupational therapist.

1.2 Supervision for Occupational Therapy Assistants is defined as follows:

1.2.1 Direct Supervision requires the supervising occupational therapist to be on the premises and immediately available to provide aid, direction, and instruction while treatment is performed in any setting including home care. Occupational therapy assistants with experience greater than one (1) full year must be supervised under either direct, routine or general supervision based upon skill and experience in the field as determined by the supervising OT.

1.3.2 Supervising occupational therapists must have at least one (1) year clinical experience after they have received permanent licensure.

1.3.3 An occupational therapist may supervise up to three (3) occupational therapy assistants but never more than two (2) occupational therapy assistants who are under direct supervision at the same time.

1.3.4 Levels of supervision should be determined by the occupational therapist before the individuals enter into a supervisor/supervisee relationship. The chosen level of supervision should be reevaluated regularly for effectiveness.

1.3.5 The supervising occupational therapist, in collaboration with the occupational therapy assistant, shall maintain a written supervisory plan specifying the level of supervision and shall document the supervision of each occupational therapy assistant. Levels of supervision should be determined by the occupational therapist before the individuals enter into a supervisor/supervisee relationship.
