PROPOSED

3511 Summer Flounder Size Limits; Possession Limits

REGISTER NOTICE #2013 - 02

1. TITLE OF THE REGULATION:

3511 Summer Flounder Size Limits; Possession Limits

2. BRIEF SYNOPSIS OF THE SUBJECT, SUBSTANCE AND ISSUE:

This action is to consider amending the summer flounder (*Paralichthys dentatus*) regulation, with possible changes to the season and minimum size limit.

Summer flounder are managed cooperatively by the Atlantic States Marine Fisheries Commission (ASMFC), the Mid-Atlantic Fishery Management Council (MAFMC) and the National Marine Fisheries Service through Amendment 13 to the Summer Flounder, Scup and Black Sea Bass Fishery Management Plan and its subsequent addenda. The ASMFC and MAFMC approved a coastwide recreational summer flounder harvest limit for 2013 resulting in recreational summer flounder allocation of 78,512 fish to Delaware. Although this is a reduction from the 2012 allocation (87,536 fish), the 2013 quota represents a 104% increase relative to Delaware's 2012 recreational harvest (38,470 fish). As such, Delaware may liberalize its management measures for the 2013 summer flounder fishery, provided the management measures are approved by the ASMFC's Summer Flounder, Scup and Black Sea Bass Management Board following established criteria.

Four options were developed and subsequently approved by the ASMFC's Summer Flounder, Black Sea Bass and Scup Technical Committee at their January 22, 2013 meeting (Table). These options will serve as the basis for the proposed regulatory change.

Table. Approved management options for proposed changes to 7 DE Admin. Code §3511 (Summer Flounder Size Limits; Possession Limits).

Option	Minimum Size	Possession Limit	Closed Season	Estimated Increase in Harvest
1	18.0 inches	4	Oct. 24 - Dec 31	0 (<i>status quo</i>)
2	17.5 inches	4	None	10.1%
3	17.0 inches	4	None	40.1%
4	16.5 inches	4	None	81.8%

It should be noted that as the estimated harvest for each option increases, the risk of exceeding the allowable catch increases. Exceeding allowable catch will result in a corresponding reduction in the following year's allowable catch.
