3700 Shellfish

1. TITLE OF THE REGULATION:

3710 Conch

3711 Conch Minimum Size Limits

3712 Commercial Conch Dredge Licenses [Commercial Conch Season]

2. BRIEF SYNOPSIS OF THE SUBJECT, SUBSTANCE AND ISSUE:

The purpose of this action is to provide Delaware's licensed knobbed conch, *Busycon carica*, dredgers with access to this resource similar to that of their New Jersey counterparts.

The Department received a request from the commercial shellfishing sector to align Delaware's knobbed conch management measures with those measures presently in place in the State of New Jersey. New Jersey's conch dredge landings are an authorized by-catch of their blue crab dredge fishery. The New Jersey conch fishery is constrained by a five-inch minimum size limit with a five month season from November 15 through April 15 and a cap of 93 dredge licenses. Delaware's directed knobbed conch fishery is presently constrained by a six-inch minimum size limit (3.5-inch minimum whorl diameter) with no closed season and delayed entry to the fishery. The lower minimum size limit in New Jersey poses a potential economic disadvantage to Delaware conch harvesters fishing the shared waterbody of Delaware Bay.

The Department agrees that parity with New Jersey's management measures is desirable; however, complete alignment (season dates and license cap) with the New Jersey by-catch fishery does not serve the best interest of Delaware's directed conch dredge fishery. Therefore, the Department proposes to adopt a five-inch minimum size limit (3-inch minimum whorl diameter) with a five month open season from January 15 through June 15. The proposed minimum size limit will provide economic parity with New Jersey and the implementation of a five month harvest season is expected to constrain harvest without unduly jeopardizing the sustainability of the resource. The number of active licenses in the Delaware conch dredge fishery (17 in 2014), does not warrant additional licensing restrictions at this time.
