

DEPARTMENT OF NATURAL RESOURCES AND ENVIRONMENTAL CONTROL

DIVISION OF AIR AND WASTE MANAGEMENT

Statutory Authority: 7 Delaware Code, Chapter 60 (7 Del.C. Ch. 60)

GENERAL NOTICE

State Implementation Plan Revision to address the Clean Air Act Section 110 Infrastructure Elements For the 2008 Lead NAAQS

Secretary's Order No. 2011-A-0041

Date of Issuance: October 14, 2011

Effective Date: October 14, 2011

Under the authority vested in the Secretary of the Department of Natural Resources and Environmental Control (Department), this Order approves the proposed revision to the State Implementation Plan(SIP), which is a statewide air management plan subject to the public notice and public hearing procedures in 7 Del.C. §6010(c).

Background

The United States Environmental Protection Agency (EPA) has delegated to the Department certain authority and duties under the federal Clean Air Act, as amended, 42 U.S.C. §§7401 et seq. (CAA). The delegation includes the administration over Delaware's SIP, which EPA requires in order to review the regulations, source specific requirements, plans and emission inventories on how Delaware will attain and maintain air quality that conforms to EPA's primary and secondary National Ambient Air Quality Standards (NAAQS). NAAQS are EPA regulations that set limits for air pollutants in order to protect the public health and the environment. Delaware's SIP is included in EPA's regulations at 40 C.F.R. Part 52, Subpart I

In 2008, EPA revised its NAAQS for lead to lower the primary and secondary limits from 1.5 micrograms per cubic meter (J.Lg/m) to 0.15 J.Lg/m³. The states are provided three years to revise their SIPs in response to EPA's revised limits. The Division of Air Quality conducted a review of the Department's regulations to determine if any regulatory changes were needed in response to the EPA lead NAAQS change. The proposed revised SIP, as published in the September 1, 2011 Delaware Registration of Regulations, sets forth the Division of Air Quality's review of Delaware's Regulations Governing the Control of Air Pollution. The proposed revised SIP cites to the appropriate regulations in which the Department already regulates lead consistent with EPA's revised NAAQS for lead. Consequently, the Division of Air Quality reports in the revised SIP that no new regulation or amendment to an existing regulation is needed to comply with EPA's NAAQS revision for lead.

The Department held a duly noticed public hearing on the SIP revision on September 22, 2011 at the Department's Dover offices. At the public hearing, the Department's expert, Ronald A. Amirikian, developed the record to support adoption of the proposed SIP revision. The Department did not receive any public comments during the public comment period. The Department's presiding hearing officer, Robert P. Haynes, who recommended approval of the SIP revision in a Report attached hereto at Appendix A.

Reasons and Findings

I adopt the Report and find that approval of the proposed SIP revision in final is supported by the record and consistent with the Department's delegated duties under the federal Clean Air Act. In conclusion, the following findings and conclusions are entered:

1. The Department finds the proposed SIP revision is well supported by the record and hereby approves the revision as a final SIP revision as it was published in the September 1, 2011 Delaware *Register of Regulations*;
2. The final approved SIP revision and this Order shall be submitted to EPA for EPA's review in order that the SIP may be approved by EPA; and
3. The Department shall publish notice of this Order in the same manner as the notice of the proposed SIP revision.

Collin P. O'Mara, Secretary

Implementation, Maintenance, And Enforcement of National Ambient Air Quality Standards (NAAQS)

State Implementation Plan Revision to address the Clean Air Act Section 110 Infrastructure Elements For the 2008 Lead NAAQS

1.0 Preamble, Introduction and Background

On October 15, 2008, the Environmental Protection Agency (EPA) revised the primary and secondary lead National Ambient Air Quality Standard (NAAQS) from 1.5 micrograms per cubic meter (µg/m) to 0.15 µg/m³. Pursuant to sections 110(a)(1) and 110(a)(2) of the Clean Air Act (CAA), each State is required to submit a State Implementation Plan (SIP) to provide for the implementation, maintenance, and enforcement of a newly promulgated or revised NAAQS. This SIP fulfills this requirement relative to the 2008 lead NAAQS.

A SIP is a state plan that identifies how that state will attain and maintain air quality that conforms to each primary and secondary NAAQS. The SIP is a complex, fluid document containing regulations, source-specific requirements, and non-regulatory items such as plans and emission inventories.

Delaware’s initial SIP was approved by the EPA on May 31, 1972. Since this initial approval, the Delaware SIP has been revised numerous times to address air quality non-attainment and maintenance issues. This was done by updating plans and inventories, and adding new and revised regulatory control requirements. Delaware’s SIP is compiled in the Code of Federal Regulations at 40 C.F.R. Part 52 Subpart I.

Section 2.0 of this document is a revision to Delaware’s SIP. The purpose of this SIP revision is to detail how Delaware meets all of the necessary implementation, maintenance, and enforcement measures required by the CAA, specifically, CAA §110(a)(2), relative to the 2008 lead NAAQS. Under the heading “Delaware’s Plan” in Section 2.0 of this document Delaware provides a revision to its SIP to address those requirements of Section 110(a)(2)(A)-(M) of the CAA which have not been addressed in other SIP revisions. It is a compilation of certain elements that describe how Delaware demonstrates how the 2008 lead NAAQS is being implemented, maintained and enforced. The elements of this SIP revision, once approved by EPA, will provide a federally enforceable written confirmation that Delaware will continue to comply with the Section 110(a)(2) requirements of the CAA.

Legislative authority for the Delaware air quality program relating to the responsibilities in the CAA is codified in Title 7 “Conservation” of the Delaware Code, Chapter 60 – Delaware’s comprehensive water and air resources conservation law, which gives the Delaware Department of Natural Resources and Environmental Control (DNREC) the power and duty to implement the provisions of the CAA in the State of Delaware.

Many of the miscellaneous requirements of Section 110(a)(2)(A)-(M) of the CAA relevant to the 2008 lead NAAQS are already contained in Delaware’s SIP. The following Table identifies those SIP provisions. The following Table also identifies those infrastructure requirements which are not applicable to Delaware.

Table - 110(a)(2)(A)-(M) Requirements Already Addressed in the Delaware SIP

Section 110(a) element	Summary of element	Provisions in the Current Delaware SIP or recent SIP revisions Submittals	Where Codified or approved by EPA
§110(a)(2)(A)	Include enforceable emission limitations and other control measures, means, or techniques (including economic incentives such as fees, marketable permits, and auctions of emissions rights), as well as schedules and timetables for compliance as may be necessary or appropriate to meet the applicable requirements of this Act.	For the 2008 lead NAAQS, the following emission limitations and schedules are contained in Delaware’s approved SIP. 7 DE Admin. Code 1101, Definitions And Administrative Principles 7 DE Admin. Code 1104, Particulate Emissions From Fuel Burning Equipment 7 DE Admin. Code 1105, Particulate Emissions From Industrial Process Operations 7 DE Admin. Code 1107, Emissions From Incineration Of Noninfectious Waste 7 DE Admin. Code 1114, Visible Emissions 7 DE Admin. Code 1127, Stack Heights	40 CFR 52.420(c)
§110(a)(2)(B)	Provide for establishment and operation of appropriate devices, methods, systems, and procedures necessary to - (i) monitor, compile, and analyze data on ambient air quality, and (ii) upon request, make such data available to the Administrator.	7 DE Admin. Code 1103, Ambient Air Quality Standards, provides for the establishment and operation of procedures necessary to monitor, compile and analyze data related to ambient air quality.	40 CFR 52.420(c)

§110(a)(2)(C)	Include a program to provide for the enforcement of the measures described in subparagraph (A) and regulation of the modification and construction of any stationary source within the areas covered by the plan as necessary to assure that national ambient air quality standards are achieved, including a permit program as required in parts C and D;	<p>Delaware implements its Construction and Operation Permit Program requirements under 7 DE Admin. Code 1102 and 1125. These existing permitting programs ensure that the construction and modification of both major and minor stationary sources do not cause or contribute to a violation of the lead NAAQS.</p> <p>7 DE Admin Code 1125 fulfills parts C and D of Title I of the CAA; governing preconstruction review and permitting of any new or modified major stationary sources of air pollutants. 1125 is approved in the DE SIP. Under 1125 any major source or modification that results in a net significant increase of lead (0.6 TPY or greater) must apply Best Available Control Technology (BACT) to reduce lead emissions, and must demonstrate that its emissions will not cause the violation of any NAAQS.</p> <p>7 DE Admin. Code 1102 provides for the evaluation and necessary regulation of any stationary source that emit equal to or greater than 0.2 lb of any air contaminate, including lead, in any one day.</p> <p>In addition, the measures described in CAA 110(a)(2)(A) are enforced, in part, through permits issued pursuant to 1102 and 1125.</p>	40 CFR 52.420(c)
§110(a)(2)(E)(ii)	(ii) requirements that the state comply with the requirements respecting state boards under section 128, and	The requirements of §110(a)(2)(E)(ii) are not applicable to Delaware because it does not have any board or body which approves air quality permits or enforcement orders.	
§110(a)(2)(E)(iii)	(iii) necessary assurances that, where the state has relied on a local or regional government, agency, or instrumentality for the implementation of any plan provision, the state has responsibility for ensuring adequate implementation of such plan provision;	The requirements of §110(a)(2)(E)(iii) are not applicable to Delaware because it does not rely on localities for specific SIP implementation.	
§110(a)(2)(F)	<p>Require, as may be prescribed by the Administrator—</p> <p>(i) the installation, maintenance, and replacement of equipment, and the implementation of other necessary steps by owners or operators of stationary sources to monitor emissions from such sources,</p> <p>(ii) periodic reports on the nature and amounts of emissions and emissions-related data from such sources, and</p> <p>(iii) correlation of such reports by the state agency with any emission limitations or standards established pursuant to this Act, which reports shall be available at reasonable times for public inspection;</p>	<p>§110(a)(2)(F)(i): Specific monitoring requirements are found in 7 DE Admin Codes 1103 and 1117. These requirements are included in Delaware's SIP.</p> <p>§110(a)(2)(F)(ii): Specific reporting requirements are found in 7 DE Admin Codes 1103 and 1117. These requirements are included in Delaware's SIP.</p> <p>These regulations in Delaware's approved SIP that are listed in 40 CFR 52.420(c) also apply to the 2008 lead NAAQS.</p>	40 CFR 52.420(c)
§110(a)(2)(G)	Provide for authority comparable to that in section 303 and adequate contingency plans to implement such authority;	7 DE Admin. Code 1115, Air Pollution Alert and Emergency Plan, contains emergency episode plan provisions that are currently approved in Delaware's SIP.	40 CFR 52.420(c)

§110(a)(2)(I)	In the case of a plan or plan revision for an area designated as a nonattainment area, meet the applicable requirements of part D (relating to nonattainment areas);	Part D pertains to general requirements for nonattainment areas. This does not apply because no part of Delaware is designated nonattainment for the 2008 lead NAAQS.	
§110(a)(2)(J)	Meet the applicable requirements of ... part C (relating to prevention of significant deterioration of air quality and visibility protection);	Delaware's PSD requirements are promulgated in 7 DE Admin. Code 1125, Preconstruction Review.	40 CFR 52.420(c)

2.0 SIP Revision

This SIP revision addresses those requirements of Section 110(a)(2)(A)-(M) of the Clean Air Act (CAA) which have not been addressed in other SIP revisions for the 2008 lead NAAQS. Each of the requirements of §110(a)(2) of the CAA (Subparagraphs A–M) is presented below, along with a discussion of Delaware's plan revision to meet the requirement.

- (A) §110(a)(2)(A) Requirement:** Include enforceable emission limitations and other control measures, means, or techniques (including economic incentives such as fees, marketable permits, and auctions of emissions rights), as well as schedules and timetables for compliance, as may be necessary or appropriate to meet the applicable requirements of this Act.

Delaware's Plan: Delaware has established laws and regulations that include enforceable emissions limitations and other control measures, means or techniques, as well as schedules and timetables for compliance to meet the applicable requirements of the CAA, to include the requirements associated with the 2008 lead NAAQS. Delaware may make changes to its laws and regulations that it believes in its discretion are appropriate, while continuing to fulfill this obligation.

At present, Delaware's statutory authority is set out in Title 7 "Conservation" of the Delaware Code, Chapter 60 – Delaware's comprehensive water and air resources conservation law. Legislative authority giving the Secretary of the Delaware Department of Natural Resources and Environmental Control the authority to promulgate Regulations is codified at 7 **Del.C.**, Chapter 60. This authority is applicable to the 2008 lead NAAQS.

- (B) §110(a)(2)(B) Requirement:** Provide for establishment and operation of appropriate devices, methods, systems, and procedures necessary to (i) monitor, compile, and analyze data on ambient air quality, and (ii) upon request, make such data available to the Administrator.

Delaware's Plan: Delaware has established and currently operates appropriate devices, methods, systems and procedures necessary to monitor, compile and analyze data on ambient air quality, and upon request, makes such data available to the Administrator. Delaware will continue to operate devices, methods, systems and procedures and may makes changes that it believes in its discretion are appropriate, while continuing to fulfill this obligation. At present, Delaware does this as follows for the 2008 lead NAAQS:

- Delaware maintains and operates a multi-station network of ambient monitors throughout the State to measure ambient air quality levels within Delaware for comparison to each NAAQS as required by 40 CFR Part 58. Delaware currently measures and reports lead concentrations from our monitoring site located in Wilmington near MLK Boulevard.
- All data is measured using U.S. EPA approved methods as either Reference or Equivalent monitors; all monitors are subjected to the quality assurance requirements of 40 CFR Part 58; Appendix A; and all samplers are located at sites that have met the minimum siting requirements of Part 58, Appendix E. The data is submitted to the EPA's Air Quality System (AQS) system, in a timely manner in accordance to the scheduled prescribed by the U.S. EPA in 40 CFR Part 58.
- In order to keep EPA informed of changes to the sampling network Delaware provides EPA Region III with prior notification of any planned changes to the network. As needed, details of these changes and anticipated approvals of the changes are communicated to EPA. On an annual basis, Delaware sends EPA a monitoring network plan as required by 40 CFR Part 58 Section 10: Annual monitoring network plan and periodic network assessment. This plan contains all required information including site and monitor description, analysis methods, operating schedule, monitoring objectives and scale of representativeness, as well as information on any planned changes. Delaware submits data to the AQS system, in a timely manner, pursuant to the schedule prescribed by the EPA in 40 CFR Part 58.
- Delaware has and will continue to submit data to EPA's Air Quality System ("AQS") in a timely manner in accordance to the scheduled prescribed by the U.S. EPA in 40 CFR Part 58.

- (C) §110(a)(2)(C) Requirement:** Include a program to provide for the enforcement of the measures described in subparagraph (A), and regulation of the modification and construction of any stationary source within the areas

covered by the plan as necessary to assure that national ambient air quality standards are achieved, including a permit program as required in parts C and D.

Delaware's Plan: Delaware has established and currently operates a program to provide for the enforcement of the enforceable emission limitations and other control measures, means, or techniques, as well as schedules and timetables for compliance, as may be necessary or appropriate to meet the applicable requirements of the CAA and to regulate the modification and construction of any stationary source within areas covered by its SIP as necessary to assure the NAAQS are achieved, including permit programs required in parts C and D. At present, Delaware as part of its Division of Air Quality function exercises its programmatic authority to utilize the enforcement powers set out in 7 **Del.C.** §6005 entitled "Enforcement; civil and administrative penalties; expenses"; 7 **Del.C.** §6013 entitled "Criminal penalties"; and 7 **Del.C.** §6018 entitled "Cease and desist order." Delaware will continue to operate this program and may make changes that it believes in its discretion are appropriate, while continuing to fulfill this obligation.

(D) §110(a)(2)(D) Requirement: Contain adequate provisions – (i) prohibiting, consistent with the provisions of this title, any source or other type of emissions activity within the State from emitting any air pollutant in amounts which will - (I) contribute significantly to non-attainment in, or interfere with maintenance by, any other State with respect to any such national primary or secondary ambient air quality standard, or (II) interfere with measures required to be included in the applicable implementation plan for any other State under part C to prevent significant deterioration of air quality or to protect visibility, (ii) insuring compliance with the applicable requirements of sections 126¹ and 115² (relating to interstate and international pollution abatement).

Delaware's Plan: Delaware's SIP presently contains adequate provisions prohibiting sources from emitting air pollutants in amounts which will contribute significantly to non-attainment or interfere with maintenance with any NAAQS and to prevent interference with measures related to preventing significant deterioration of air quality or which have to date proved adequate to protect visibility and to address interstate and international pollutant abatement; however, Delaware may make changes that it believes in its discretion are appropriate, while continuing to fulfill this obligation. At present, Delaware's legal authority is contained in the following:

- Delaware Code Title 7, Chapter 60 § 6010(c). Rules and regulations; plans. The Secretary may formulate, amend, adopt and implement, after public hearing, a statewide air resources management plan to achieve the purpose of this chapter and comply with applicable federal laws and regulations. Since 110(a)(2)(D) is in the CAA, and thus a law, Delaware has the legal authority to regulate sources of interstate transport to areas in nonattainment, or in those areas maintaining the NAAQS, if they were previously nonattainment.
- 110(a)(2)(D)(i)(I): The physical properties of lead prevent lead emissions from experiencing a significant degree of travel in the ambient air. No complex chemistry is needed to form lead or lead compounds in the ambient air; therefore, concentrations of lead are typically highest near lead sources. More specifically, there is a sharp decrease in lead concentrations as the distance from a lead source increases. According to EPA's last published *Latest Findings on National Air Quality* report, lead concentrations for sites that are not near a source of lead are approximately 10 times less than the typical concentrations near the source (http://www.epa.gov/airtrends/2007/report/trends_report_full.pdf). An example of the degree to which lead concentration decreases with distance in ambient air is characterized in the EPA memo *Selection of Airports for the Airport Monitoring Study*: "The Santa Monica airport monitoring study... reported a three- to four-fold decrease in ambient lead concentrations over a distance of 80 meters between two monitors sited to evaluate the lead gradient downwind from the runway" (<http://www.epa.gov/otaq/regs/nonroad/aviation/memo-selc-airport-mon-stdy.pdf>).

Accordingly, in order for a source to emit lead that may contribute significantly to nonattainment in, or

1. §126(a) - Each plan shall (1) require each major proposed new or modified source (A) subject to Part C or (D) which may significantly contribute to pollution in excess of the NAAQS in any AQCR outside the State in which such source intends to locate or modify, to provide written notice to all nearby States the pollution levels of which may be affected by such source 60 days prior to the date on which commencement of construction is to be permitted by the State, and (2) identify all major existing stationary sources which may have the impact described in (1) with respect to new or modified sources and provide notice to all nearby States of the identity of such sources. (b) Any State may petition EPA for a finding that any major source or group of stationary sources emits or would emit any pollutant in violation of the prohibition of §110(a)(2)(D)(ii) or this section. (c) Notwithstanding any permit which may have been granted by the State, it shall be a violation of this section and the plan - (1) for any major proposed new or modified source with respect to which a finding has been made under subsection (b) to be constructed or to operate in violation of this section and the prohibition of §110(a)(2)(D)(ii) or this section, or (2) for any major existing source to operate more than 3 months after such finding has been made. EPA may permit the continued operation of a source beyond the expiration of the 3-month period if the source complies with the emission limitations and compliance schedules as may be provided by EPA to bring about compliance with the requirements of §110(a)(2)(D)(ii). Nothing shall be construed to preclude any such source from being eligible for an enforcement order under §113(d) after the expiration of such period during which EPA has permitted continuous operation.

interfere with maintenance by, any other state, the source would need to be a very large source that is located in close proximity to state boundaries. Delaware does not have any existing sources of lead that are very large (i.e., none with emission greater than 0.5 TPY). In fact, the emission of lead from Delaware's entire point source inventory (2008), in the aggregate, is less than one (1) ton per year of lead, and only two sources (Evraz Claymont Steel and Indian River Generating Station) have emissions greater than 0.3 ton of lead per year (0.34 and 0.31, respectively). Further, even though Delaware's largest two lead emitting sources are relatively small, lead reductions are anticipated due to unit shut downs, and as a co-benefit to required mercury and sulfur dioxide reduction measures.

All major stationary sources are subject to Prevention of Significant Deterioration (PSD) permitting programs under the PSD of 7 **DE Admin. Code** 1125, Preconstruction Review. The requirements of 1125 ensure no new or modified lead emitting source will cause or contribute to non-attainment in any area.

- 110(a)(2)(D)(i)(II): The requirements of CAA 110(a)(2)(D)(i)(II) are met by new major sources and major modifications in Delaware being subject to the PSD requirements which are contained in Section 3.0 of 7 **DE Admin. Code** 1125, Preconstruction Review.
- 110(a)(2)(D)(ii): Nothing in Delaware's statutory or regulatory authority prohibits or otherwise interferes with Delaware's ability to exercise sections 126 and 115 of the CAA.

(E) §110(a)(2)(E) Requirement: Provide (i) necessary assurances that the state (or, except where the Administrator deems inappropriate, the general purpose local government or governments, or a regional agency designated by the state or general purpose local governments for such purpose) will have adequate personnel, funding, and authority under state (and, as appropriate, local) law to carry out such implementation plan (and is not prohibited by any provision of federal or state law from carrying out such implementation plan or portion thereof), (ii) requirements that the State comply with the requirements respecting State boards under section 128,³ and (iii) necessary assurances that, where the state has relied on a local or regional government, agency, or instrumentality for the implementation of any plan provision, the state has responsibility for ensuring adequate implementation of such plan provision.

The elements of §110(a)(2)(E)(ii) and (iii) are not applicable to Delaware as discussed in Section 1.0 of this document.

Delaware's Plan: With respect to the remaining obligations under this section, Delaware has adequate authority under state law pursuant to 7 **Del.C.** Chapter 60 to carry out its SIP obligations with respect to the 2008 lead NAAQS. DNREC does not believe that there is any prohibition in any federal or state law that would prevent it from carrying out its SIP or any portion thereof. Further, DNREC assures EPA that it has, through the State of Delaware General Fund and through the Title V fee program, and will continue to have, funding to carry out its SIP obligations. Further, DNREC believes its funding sources are sufficient to provide adequate personnel for those purposes; however, Delaware may make changes that it believes in its discretion are appropriate, while continuing to fulfill this obligation.

At present Delaware fulfills this obligation by virtue of having adequate personnel and funding through the CAA §105 grant process (federal grant funds), the State of Delaware general fund (state tax revenues), and appropriated special funds collected by the State of Delaware from application fees, permit fees, renewal fees, and civil or administrative penalties or fines. The Division of Air Quality is responsible for developing,

2. §115(a) - Whenever EPA, upon receipt of reports, surveys or studies from any duly constituted international agency has reason to believe that any pollutants emitted in the US cause or contribute to pollution which may reasonably be anticipated to endanger public health or welfare in a foreign country or whenever the Secretary of State requests it to do so, EPA shall give formal notification to the Governor of the State in which such emissions originate. (b) The EPA notice shall be deemed to be a finding under §110(a)(2)(H)(ii) which requires a plan revision with respect to so much of the applicable plan as is inadequate to prevent or eliminate the endangerment. Any foreign country so affected by such emission of pollutants shall be invited to appear at any public hearing associated with any revision of the appropriate portion of the applicable plan. (c) This section shall apply only to a foreign country which EPA determines has given the US the same rights with respect to the prevention or control of air pollution occurring in that country. (d) Recommendations issued following any abatement conference conducted prior to CAA 1977 shall remain in effect with respect to any pollutant for which no NAAQS has been established under §109 unless EPA, after consultation with all agencies, which were party to the conference, rescinds any such recommendation.

3. §128 (a) each plan shall contain requirements that - (1) any board or body which approves permits or enforcement orders shall have at least a majority of members who represent the public interest and do not derive any significant portion of their income from persons subject to permits or enforcement orders, and (2) any potential conflicts of interest by members of such board or body or the head of an executive agency with similar powers be disclosed. A State may adopt any requirements respecting conflicts of interest for such boards or bodies or heads of executive agencies, or any other entities which are more stringent than the requirements of (1) and (2).

implementing, and enforcing the SIP. Delaware does not anticipate the need for additional resources beyond those to be appropriated in the above manner to carry out its SIP requirements.

- (F) §110(a)(2)(F) Requirement:** Require, as may be prescribed by the Administrator - (i) the installation, maintenance, and replacement of equipment, and the implementation of other necessary steps, by owners or operators of stationary sources to monitor emissions from such sources, (ii) periodic reports on the nature and amounts of emissions and emissions-related data from such sources, and (iii) correlation of such reports by the State agency with any emission limitations or standards established pursuant to this Act, which reports shall be available at reasonable times for public inspection.

Delaware's Plan: Delaware requires that owners or operators of stationary sources monitor and submit periodic reports on the nature and amounts of lead emissions and emissions related-date emissions from the sources. This may include the installation, maintenance and replacement of equipment, where appropriate. This information submitted to DNREC is available to the public at reasonable times for public inspection pursuant to Delaware law. Delaware will continue to require reporting of emissions but may makes changes that it believes in its discretion are appropriate, while continuing to fulfill this obligation.

Except as specifically exempted by the Delaware Freedom of Information Act, 29 **Del.C.** Chapter 100, Delaware makes all records, reports or information obtained by the Department or referred to at public hearings available to the public pursuant to the provisions of the Delaware Freedom of Information Act, 29 **Del.C.** Chapter 100.

- (G) §110(a)(2)(G) Requirement:** Provide for authority comparable to that in section 303 and adequate contingency plans to implement such authority;⁴

Delaware's Plan: Delaware has authority comparable to that in section 303 and adequate contingency plans to implement such authority but may makes changes that it believes in its discretion are appropriate, while continuing to fulfill this obligation.

7 **Del.C.** §6003(a)(1) requires a permit from the Secretary prior to discharging any air contaminant. 7 **Del.C.** §6002(2) defines air contaminant essentially as any substance other than uncombined water. 7 **Del.C.** §6005 allows the Secretary to seek a preliminary or permanent injunction or temporary restraining order for any discharge of an air contaminant without a permit, and issue cease and desist orders for violations (7 **Del.C.** §6018). Thus, it necessarily follows that any discharge of an air contaminant, including lead, that would cause imminent & substantial endangerment to the health, safety and welfare of the people of the State of Delaware or the environment would constitute a sufficient basis for the Secretary to seek an injunction or temporary restraining order to halt the violation.

- (H) §110(a)(2)(H) Requirement:** Provide for revision of such plan - (i) from time to time as may be necessary to take account of revisions of such national primary or secondary ambient air quality standard or the availability of improved or more expeditious methods of attaining such standard, and (ii) except as provided in paragraph (3)(C), whenever the Administrator finds on the basis of information available to the Administrator that the plan is substantially inadequate to attain the national ambient air quality standard which it implements or to otherwise comply with any additional requirements established under this Act.

Delaware's Plan: Delaware will review and revise its SIP from time to time as may be necessary to take account of revisions of such primary or secondary NAAQS or the availability of improved or more expeditious methods of attaining such standard and whenever the Administrator finds on the basis of information available to the Administrator that the plan is substantially inadequate to attain the NAAQS which it implements or to otherwise comply with any additional requirements established under the CAA.

- (I) §110(a)(2)(I) Requirement:** In the case of a plan or plan revision for an area designated as a non-attainment area, meet the applicable requirements of part D (relating to non-attainment areas).

4. Sec. 303- Notwithstanding any other provisions of this Act, the Administrator upon receipt of evidence that a pollution source or combination of sources (including moving sources) is presenting an imminent and substantial endangerment to public health or welfare, or the environment, may bring suit on behalf of the United States in the appropriate United States District court to immediately restrain any person causing or contributing to the alleged pollution to stop the emission of air pollutants causing or contributing to such pollution or to take such other action as may be necessary. If it is not practicable to assure prompt protection of public health or welfare or the environment by commencement of such a civil action, the Administrator may issue such orders as may be necessary to protect public health or welfare or the environment. Prior to taking any action under this section, the Administrator shall consult with appropriate State and local authorities and attempt to confirm the accuracy of the information on which the action proposed to be taken is based. Any order issued by the Administrator under this section shall be effective upon issuance and shall remain in effect for a period of not more than 60 days, unless the Administrator brings an action pursuant to the first sentence of this section before the expiration of that period. Whenever the Administrator brings such an action within the 60-day period, such order shall remain in effect for an additional 14 days or for such longer period as may be authorized by the court in which such action is brought.

Delaware's Plan: This does not apply because no part of Delaware is designated nonattainment for the 2008 lead NAAQS.

- (J) **§110(a)(2)(J) Requirement:** Meet the applicable requirements of section 121 (relating to consultation), section 127 (relating to public notification), and part C (relating to prevention of significant deterioration of air quality and visibility protection).⁵

Delaware's Plan: Delaware will meet the applicable requirements of section 121 (relating to consultation), section 127 (relating to public notification), and part C (relating to prevention of significant deterioration of air quality and visibility protection); but may make changes that it believes in its discretion are appropriate, while continuing to fulfill this obligation. At present, Delaware does so utilizing the following:

- **7 DE Admin. Code 1132**, Transportation Conformity, provides a legal platform for the various consultation procedures that have been developed between DNREC, DELDOT, and the Metropolitan Planning Organizations (MPOs). The MPOs provide a forum for consultation with local governments. Delaware's MPOs are: WILMAPCO, Kent County MPO, and the Salisbury-Wicomoco MPO. Regional planning organizations provide the forum for inter-state consultations. Additionally, consultations with Federal Land Managers are on-going in accordance with EPA Rules. All SIP revisions and new/amended regulations undergo public notice and hearing, pursuant to 7 DE Code Chapters 29 and 60, which include publication in the newspapers and in the Delaware Register, and which have allowed for comment by the both the public and local political subdivisions. Delaware believes the public notice and hearing processes also fulfill the section 121 consultation process. The submitted attainment plans and regulations in the approved Delaware SIP specify the organizations responsible for implementing and enforcing the plans.
- DNREC makes real-time and historical air quality information available on its Web site.
- PSD requirements relative to the 2008 lead NAAQS are SIP approved and implemented through the requirements of **7 DE Admin. Code 1125**, Preconstruction Review.
- With regard to visibility protection, there are no new applicable visibility protection obligations under section 110(a)(2)(J) as a result of the 2008 lead NAAQS. Delaware is complying with, and will continue to comply with the visibility protection and regional haze program requirements under Part C of the CAA.

- (K) **§110(a)(2)(K) Requirement:** Provide for - (i) the performance of such air quality modeling as the Administrator may prescribe for the purpose of predicting the effect on ambient air quality of any emissions of any air pollutant for which the Administrator has established a national ambient air quality standard, and (ii) the submission, upon request, of data related to such air quality modeling to the Administrator.

Delaware's Plan: Delaware has the authority and technical capability to conduct air quality modeling in order to assess the effect on ambient air quality of relevant pollutant emissions, and will continue to perform modeling as necessary, but may make changes that it believes in its discretion are appropriate, while continuing to fulfill this obligation. Delaware will continue to submit to the EPA the Air Quality modeling data as part of Delaware's relevant SIP submissions, permit actions, and through federal grant commitments or in other ways that EPA may request.

- (L) **§110(a)(2)(L) Requirement:** Require the owner or operator of each major stationary source to pay to the permitting authority, as a condition of any permit required under this Act, a fee sufficient to cover - (i) the reasonable costs of reviewing and acting upon any application for such a permit, and (ii) if the owner or operator receives a permit for such source, the reasonable costs of implementing and enforcing the terms and conditions of any such permit (not including any court costs or other costs associated with any enforcement action), until such fee requirement is superseded with respect to such sources by the Administrator's approval of a fee program under Title V.

Delaware's Plan: In a manner consistent with Delaware law, Delaware will continue to require the owner or operator of each major stationary source to pay to the permitting authority, as a condition of any permit

5. §121. - In carrying out requirements for plans to contain - (1) any transportation controls, air quality maintenance plan requirements or preconstruction review of direct sources of pollution, or (2) any measure referred to - (A) in part D), or (B) in part C, and in carrying out the requirements of §113(d), the State shall provide a satisfactory process of consultation with general purpose local governments, designated organizations of elected officials of local governments and any FLM having authority over Federal land to which the State plan applies. Such process shall be in accordance with regulations promulgated by EPA. Only a general purpose unit of local government, regional agency, or council of governments adversely affected by action of EPA approving any portion of a plan may petition for judicial review.

§127. (a) - Each plan shall contain measures to regularly notify the public of when any NAAQS is exceeded or was exceeded during the preceding year, to advise the public of health hazards associated with such pollution, and to enhance awareness of measures which can be taken to prevent the standards from being exceeded and ways in which the public can participate in regulatory and other efforts to improve air quality.

required under this Act, a fee sufficient to cover (i) the reasonable costs of reviewing and acting upon any application for such a permit, and (ii) if the owner or operator receives a permit for such source, the reasonable costs of implementing and enforcing the terms and conditions of any such permit (not including any court costs or other costs associated with any enforcement action), until such fee requirement is superseded with respect to such sources by the Administrator's approval of a fee program under title V pursuant to Delaware law. Delaware currently fulfills this under the enabling authority of 7 **Del.C.** §§6095 to 6099 and fee legislation that currently is renewed every three years. Delaware has a fully approved Title V operating permits program. See paragraphs (b) and (c) under "*Delaware*" in Appendix A to 40 CFR Part 70—Approval Status of State and Local Operating Permits Programs. Delaware may make changes that it believes in its discretion are appropriate, while continuing to fulfill this obligation.

(M) §110(a)(2)(M) Requirement: Provide for consultation and participation by local political subdivisions affected by the plan.

Delaware's Plan: Delaware will continue to provide for consultation and participation by local political subdivisions affected by the SIP pursuant to the public notice laws found in 7 **Del.C.** §§6006 and 6010 and 29 **Del.C.** Chapters 10003, 10004 and 10115, as applicable. Furthermore, all SIP revisions undergo public notice and hearing which have allowed for comment by the public which includes local political subdivisions. We believe the public notice and hearing processes fulfill the requirements for consultation with local political subdivisions affected by the SIP.

3.0 Conclusion

Based on the information provided above, Delaware fully complies with the requirements of §110(a)(2)(A) through §110(a)(2)(M).

15 DE Reg. 694 (11/01/11) (Final)
