Executive Summary

Summary Delaware's ACIST (Assertive Community Integration **Description** Support Team) program supports individuals who **Including Goals** have a Severe and Persistent Mental Illness (SPMI) and Objectives and an intellectual and developmental disabilities (I/DD) or Autism using a comprehensive, holistic, multi-disciplinary team-based approach to crisis intervention, intensive case management, behavior analysis, psychiatric supports and monitoring of medical conditions. The ACIST Health Home program design uses a whole-person approach to supports and services for individuals with dual diagnosis (SPMI & I/DD) while ensuring strong integration across behavioral health, somatic health and long-term supports and services. The ACIST program is tailored to individuals with chronic conditions of SPMI and I/DD who may require additional and/or different services or modalities to ensure effectiveintervention. The goals of the ACIST Health Home are:

> a) To lessen or eliminate critical health and safety issues that each individual member might experience, working toward preventing or mitigating these signs, symptoms, and/or social issues that

could lead to crisis situations and the need for
 hospitalization or re-hospitalization
 b) To provide transitional support and post psychiatric hospitalization follow along that will assist
 the individual in ameliorating the effects of their mental health condition and dual diagnosis and
 prevent avoidable readmissions
 c) To improve the overall medical and physical

health of the individual

d) To meet basic human needs and enhance quality of life

e) To improve the person's opportunity to be successful in social and employment roles and activities

f) To increase active participation in the person's community

g) To partner with families, support systems and/or significant other in supporting the individual's recovery

Program Authority

1945 of the Social Security Act

The state elects to implement the Health Homes state plan option under Section 1945 of the Social Security Act.

Name of Health Homes Program

Assertive Community Integration Support Team

Executive Summary

Provide an executive summary of this Health Homes programincluding the goals and objectives of the program, the population, providers, services and service delivery model used

Delaware's ACIST (Assertive Community Integration Support Team) program supports individuals with Severe and Persistent Mental Illness (SPMI) and I/DD and/or Autism to receive a comprehensive, holistic teambased approach to crisis intervention, intensive case management, behavior analysis, psychiatric supports and monitoring of medicalconditions in a multi-disciplinary model. The ACIST Health Home program is designed to provide a whole-person approach to supports and servicesto individuals with dual diagnosis and to ensure strong integration acrossbehavioral health, somatic health and long-term supports and services. The ACIST program is tailored to individuals with chronic conditions of SPMI and I/DD who may require additional and/or different services or modalities to ensure effective intervention. The goals of the ACIST Health Home are:

a) To lessen or eliminate critical health and safety issues, that eachindividual client might experience, toward preventing or mitigating these signs, symptoms, and/or social issues that could lead to crisis situationsand the need for hospitalization or re-hospitalization

b) To provide post psychiatric hospitalization follow along that will assist the individual in ameliorating the effects of their mental health condition and dual diagnosis

c) To improve the overall medical and physical health of the individual

d) To meet basic human needs and enhance quality of life

e) To improve the person's opportunity to be successful in social and employment roles and activities

f) To increase active participation in the person's community

g) To partner with families and/or support systems in supporting the individual's recovery

The health home providers will be designated ACIST entities meeting rigorous provider qualifications, including demonstrated experience working with the target population. The program will operate in a fee-for-service service delivery system, utilizing a per-member-per-month-payment.

General Assurances

The state provides assurance that eligible individuals will be given a free choice of Health Homes providers.

The states provides assurance that it will not prevent individuals who are dually eligible for Medicare and Medicaid from receiving Health Homesservices.

The state provides assurance that hospitals participating under the state plan or a waiver of such plan will be instructed to establish procedures forreferring eligible individuals with chronic conditions who seek or needtreatment in a hospital emergency department to designated Health-Homes providers. The state provides assurance that FMAP for Health Homes services shall be 90% for the first eight fiscal quarters from the effective date of the SPA. After the first eight quarters, expenditures will be claimed at the regularmatching rate.

The state provides assurance that it will have the systems in place so that only one 8-quarter period of enhanced FMAP for each health homes enrollee will be claimed.

The state provides assurance that there will be no duplication of services and payment for similar services provided under other Medicaidauthorities.

Describe the process used

Members will initially be identified via multiple streams to include butnot be limited to; self-referral, community navigators, supportcoordinators, professionalssupporting individuals in day orresidential services, medical andpsychiatric professionals, hospitals, and psychiatric facilities.

Reciprocal coordination will occurbetween Health Home andcorresponding DSAMH (Division of Substance Abuse and Mental-Health) services to include the-DSAMH Eligibility and Enrollment-Unit regarding individuals referred to either program who may bemore effectively served withinanother program. Enrollment will take place once

application is received and all relevant medical and psychiatricdocumentation has been reviewed to confirm the qualifyingdiagnoses.

Individuals will be advised of theirreferral to the Health Home, andwill be informed of all availableoptions for services so that they can make an informed decision as towhether they will elect to remain inor opt out of the Health Home.

Enrollment is complete uponsubmission of qualifying diagnoses and consent for treatment has been signed. Consent for release ofinformation will authorize sharingof information between identifiedservice providers, the State, applicable Managed Care-Organizations (MCO's) and other fee for service providers.

The state provides assurance that it will clearly communicate the individual's right to opt out of the Health Homes benefit or to change Health Homes providers at any time and agrees to submit to CMS a copy of any letter or communicationused to inform the individuals of the Health Homes benefit and their rights to choose or change Health Homes providers or to elect not to receive the benefit

Provider Infrastructure

Describe the infrastructure of provider arrangements for Health Home Services

Each Certified ACIST Health Home Provider must maintain the following minimum standards. ACIST services teams will be based on a 50 person program with staff to client ratio of 1:10. ACIST services will be provided statewide by the designated providers. The average numbers of full-time employees (FTEs) for each level of staff reflected for each ACIST team are below.

Position Requirements

Team Leader: 1 FTE Master's level clinician- oversees program delivery and operation

Prescriber (Psychiatrist or Psychiatric Nurse Practitioner): 1 PT @ 25 hours per week: Initial appointments 30-45 minutes; 15 minute med checks foreach individual once per month; participation in daily and team meetings. Note: the prescriber is a pivotal team member assisting with crisisresponse, however, his/her direct services are billed through the Medicaid State Plan.

Registered Nurse (RN): 1FTE: follow up on medical and psychiatricappointments; assist prescriber with monthly appointments; attend daily meetings; attend team meetings as needed.

Case Manager/Behavior Analyst (CM/BA) (Bachelor's degree or higher; background and experience writing and/or working with behavior plans.): 2 FTE coordinate psychiatric and medical appointments; educate families about Mental Health diagnosis; develop treatment plan with individual; work with individual, residential staff, families to understand reasons for interventions on the behavior plan and how to properly use interventions; participate in daily meetings and team meetings.

Master's Level Clinician: 1 FTE (can be an additional Behavior Analyst); attend daily meetings; attend team meetings; provide individual and/or family therapy two times per month (more frequently if needed); participate in the development of treatment and behavior plans;

As demonstrated above, Delaware's health home program will use a comprehensive team of medical, mental health, developmental disability, social services, and other disciplines to ensure that enrollees receiveneeded medical, behavioral, developmental disability supports, includingcommunity based crisis prevention and response services. These supports are either provided directly by the designated health home provider or the health home provides needed linkages to all supports and services, in accordance with the individual's overarching person-centered plan. All team members will be responsible for communication on the individual's status, treatment options, actions taken and outcomes as a result of any intervention. All members of the team are also responsible for ensuring that all care and support provided is person-centered, culturally competent and linguistically capable.

To ensure the ongoing caliber of health home services, the State willmaintain a highly collaborative and coordinated working relationship witheach designated provider through regular, frequent communication and feedback. The state will also provide ongoing opportunities for continuous learning and best practice identification for all health home providerentities. Health Homes Providers

Supports for Health Homes Providers

Describe the methods by which the state will support providers of Health Homes services in addressing the following components

- 1. Provide quality-driven, cost-effective, culturally appropriate, and person- and family- centered Health Homes services
- 2. Coordinate and provide access to high quality health care services informed by evidence-based clinical practice guidelines
- 3. Coordinate and provide access to preventive and health promotion services, including prevention of mental illness and substance use disorders
- Coordinate and provide access to mental health and substance abuse services
- 5. Coordinate and provide access to comprehensive care management, care coordination, and transitional care across settings. Transitional care includes appropriate follow-up from inpatient to other settings, such as participation in discharge planning and facilitating transfer from a pediatric to an adult system of health care
- Coordinate and provide access to chronic disease management, including self-management support to individuals and their families
- 7. Coordinate and provide access to individual and family supports, including referral to community, social support, and recovery services
- 8. Coordinate and provide access to long-term care supports and services

- 9. Develop a person-centered care plan for each individual that coordinates and integrates all of his or her clinical and non-clinical health-care related needs and services
- 10. Demonstrate a capacity to use health information technology to link services, facilitate communication among team members and between the health team and individual and family caregivers, and provide feedback to practices, as feasible and appropriate
- 11. Establish a continuous quality improvement program, and collect and report on data that permits an evaluation of increased coordination of care and chronic disease management on individual-level clinical outcomes, experience of care outcomes, and quality of care outcomes at the population level

Description

The State provides ongoing and regular technical assistance, sufficient resources, and partnership with all elements noted above.

1. Detailed provider manuals and protocols delineating all expectations and practice guidelines;

2. Specifications for all required quality reporting;

3. Access to and training on state-specified information technology;

4. Introductions and follow up to ensure effective relationship

establishment with all related provider types within the state; and,

5. Any as-needed and ad-hoc supports needed by the provider to ensure their effective execution of the Health Home

The state will provide ongoing monitoring and swift interventions to ensure continuous high quality health home services.

Other Health Homes Provider Standards

The state's requirements and expectations for Health Homes providers are as follows

The state's requirements and expectations for Health Homes providers are as follows:

The following requirements apply to the provision of services for all Certified ACIST Health Home Providers:

1. Services will maintain best practice guidelines for SPMI and IDD/Autism including integration of CMS' definition of community inclusion and must adhere to all applicable requirements set forth by the State of Delaware.

2. Health Home shall have sufficient clinical, administrative and information technology infrastructure to ensure that it is capable of meeting standards.

3. The majority of services will be provided in the home and community where the individual lives rather than in an office, unless requested by the individual and substantiated in the individual record.

4. An appropriate level of supports will be provided to each individual; with frequency and duration of each contact being provided at a level specific to the individual's need as specified in the treatment plan. 5. Housing options for the individuals served must meet criteriaestablished by the state as appropriate and meet all required licensing and certification requirements as necessary.

6. A team approach will be utilized in which all team members are familiar with the needs of each individual served by the team and are capable of providing the appropriate treatment interventions to them when called upon to do so.

7. Multiple team members will interact with each individual supported in any given day/week/month across agency and family settings.

8. The teams will have daily meetings at which time each individual's needs are reviewed and treatment strategies are delineated and treatment plans updated, as required by clinical and professional determinations in accordance with the individual's person-centered plan.

9. The teams will have responsibility for acute crisis services, by providing 24 hour coverage; with staff being available either by phone or in person, as appropriate, to help diffuse crisis situations and maintain community status. The contactor is not permitted to use automated phone trees as its answering service. The goal of 24 hour coverage is to intervene during acute crisis situations to reduce or eliminate the need for hospitalization.

10. The team will maintain an effective working relationship with the state's Division of Substance Abuse and Mental Health's Mobile Crisis Unitin order to respond to calls for individuals who are ACIST members and/or are being seen by the ACIST provider.

11. Health home provider will develop and implement a Quality-Improvement Program designed to ensure services are consistentlydelivered to individuals in accordance with the Health Home services and in alignment with best practice guidelines. The program will also assure that services are based on a recovery model, person centered, and trauma informed. Results of QI activities will be written and submitted to the stateon a monthly basis.

12. The health home provider will comply with all record reportingsystems required and provided by the state including automated client record keeping system.

Rate Development

Provide a comprehensive description in the SPA of the manner in which rates were set

- 1. In the SPA please provide the cost data and assumptions that were used to develop each of the rates
- 2. Please identify the reimbursable unit(s) of service
- 3. Please describe the minimum level of activities that the state agency requires for providers to receive payment per the defined unit
- 4. Please describe the state's standards and process required for service documentation, and
- 5. Please describe in the SPA the procedures for reviewing and rebasing the rates, including
 - the frequency with which the state will review the rates, and
 - the factors that will be reviewed by the state in order tounderstand if the rates are economic and efficient and sufficient to ensure quality services.

Comprehensive1. The Delaware ACIST service will be a Per MemberDescriptionPer Month (PMPM) rate as allowed under the Health
Home (HH) service model.The rate includes personnel cost, occupancy, travel,
administration and general, and variable costs. The
data for the rate computation was taken from actual
expenditures of the contracted agency for the pilot

demonstration, another agency who had bid for the pilot demonstration, and wage data from the Bureau of Labor and Statistics.

Salary models were built using FTE and salary information across benchmark data provided by: The contracted state-funded pilot

demonstration provider;

• Another respondent to the pilot demonstration RFP; and

Bureau of Labor and Statistics (BLS) The staffing plan and respective FTEs for each ACIST team were initially established by DDDS in the RFP for the ACIST pilot and are also codified in the SPA. These specifications were determined to be necessary forthe successful operation of the ACIST program, with considerations for expected member acuity and minimum levels of service. Salaries for all position types were compared across the three data sources. The annual salary costs used for the rate were the average of the three benchmarks with similar titles and position descriptions. The \$67,650 established for Team Leader is an average of salary specified for the pilot vendor, the other bidder that was notselected and BLS classification of "Social and Community Service Managers". The \$148,860 established for Psychiatric Nurse Practitioner is an average of the pilot agency, the non-selected RFP bidder and the 90th percentile of the BLS classification of "Nurse Practitioner". The \$69,633 established for Registered Nurse is an average of the pilot agency, the non-selected vendor, and the BLSclassification "Registered Nurse". The \$39,040 established for Case Manager is an average of Case Manager for the pilot agency, Case Manager for the non-selected bidder and the BLS classification "Substance Abuse, Behavioral Disorder, and Mental-Health Counselors". The \$49,369 established for-Licensed Clinician is an average of Licensed Clinician for the pilot agency, Master's Prepared Clinician forthe non-selected bidder and the BLS classification

"Mental Health and Substance Abuse Social Worker". The \$225,907 established for Psychiatrist is an average of Psychiatrist for the pilot vendor, the Director of Reintegration Services for the nonselected bidder and the BLS classification of "Psychiatrist". The \$31,795 established for Administrative Assistant is an average of Administrative Assistant for the pilot vendor, Administrative Assistant for the non-selected bidderand the BLS classification "Administrative Assistant". Transportation costs were calculated using different vehicle estimates as a benchmark for determining the annual cost of vans and sedans involved with necessary transportation to/from/of members forprogram activities. Costs for vehicles were estimated using values obtained from Kelley Blue Book for used 2016 vehicles in the Delaware area. Repair and Maintenance cost was estimated at 10% of the value of the vehicle. Insurance costs were established at \$2,000 per vehicle, and due to the high need for transportation as part of this program, mileage was estimated at 15,000 miles per vehicle. In total, 4 vehicles were allocated for client transportation foreach ACIST team including, three sedans and one van, for a total annual cost of \$37,128. Payroll Taxes and Fringe Benefit cost was estimated at the national average Taxes and Fringe rate of 31.70% as per BLS. The ACIST program also incorporates administration and general at 12% of direct personnel costs, upon DHSS recommendation. This is consistent with the budget proposals received from the pilot vendor and the non-selected vendor. Occupancy cost was benchmarked per FTE, at \$6,281, based on the pilot vendor's occupancy costs, since they are currently the only provider and their program most closely mimics the staffing planestablished by DDDS. In addition, a Discretionary Cost PMPM of \$5.75 was applied to the overall PMPM rate based on the need for educational, recreational, or food supplies for members in order to facilitate

conversations and services.

2. Per member per month rate. 3. HH providers must deliver at least three (3) of the six defined core HH services within the calendarmonth to the eligible HH beneficiary in order toreceive a PMPM that month. To receive the first-PMPM payment for an eligible HH beneficiary, a HHprovider must inform the HH beneficiary aboutavailable HH services, receive the beneficiary'sconsent to receive HH services, and begin thedevelopment of a care plan. The development of the care plan will follow standards for Comprehensive-Care Management described in the SPA. This activity is tracked through the Electronic Health Record (EHR). Each of the six core services has a list of activitieswithin that service that the Support-

Coordinator/Community Navigator will check on a monthly basis. HH providers will submit claims via MMIS using a designated coding for health homeservices. Any other State Plan Medicaid servicesdelivered by a HH will be claimed fee for serviceseparate and distinct from the Health Home monthlyservice.

4. Any claim for HH services shall be supported by written documentation in the EHR. Minimumdocumentation requires that HH provider document HH activity under any of the six core health home services it has delivered that month, including Comprehensive Care Management, Care Coordination, Health Promotion, Comprehensive Transitional Care from Inpatient to Other Settings, Individual and Family Support, or Referral to-Community and Social Support Services. . Documentation must include the service, frequency, duration and actions taken by the HH staff and the response of the recipient and any progress towards stated outcome(s). Documentation will be reviewed within the EHR by the assigned Support Coordinator/Community Navigator on a monthlybasis. All claims for health home services will be

subject to regular audits to ensure that Medicaid payments made to HH providers are consistent with efficiency, economy and quality of care, and made in accordance with federal and state conditions of payment.

5. Rates will be considered for rebasing after each fiscal year, with a minimum of a rebased rate every three years.

a. During annual rate reviews, the State will assess utilization levels and quality improvement metrics to determine the quality of services and the need for rate adjustments. b. Factors such as cost of living and cost inputs from additional ACIST providers and teams will also be considered.

Health Homes Payment Methodologies MEDICAID | Medicaid State Plan | Eligibility, Health Homes | DE2018MS00020 | DE-18-0006 | Assertive Community Integration Support Team **Package Header** Package ID DE2018MS000 SPA ID DE-18-0006 20 Initial Submission N/A Submission Type Official Date Effective Date 10/1/2018 Approval Date N/A Superseded SPA N/A Ð Assurances

The State provides assurance that it will ensure non-duplication of payment for services similar to Health Homes services that are offered/covered under a different statutory authority, such as 1915(c) waivers or targeted case management.

Describe below	Delaware will ensure non-duplication between Health
how non-	Home benefits and State Plan and Medicaid HCBS
duplication of	services through person-centered planning practices.
payment will be	All underlying state plan benefits including those
achieved	available to a child through EPSDT will be billed
	separately and directly by appropriate provider. In-
	addition, individuals receiving health home benefits
	who are also enrolled in Delaware's HCBS Lifespan
	Waiver (CMS Control Number DE0009) will be
	ineligible to also receive the included HCBS waiver
	services of behavior analysis and nurse consultation.
	Individuals receiving health home benefits may not
	receive services through the Delaware Promise
	program as authorized through the state's approved
	1115 demonstration program except to the extent
	that those services are over and above that which is
	available under the ACIST program.

The state has developed payment methodologies and rates that are consistent with section 1902(a)(30)(A).

 The State provides assurance that all governmental and private providers are reimbursed according to the same rate schedule, unless otherwise described above.

The State provides assurance that it shall reimburse providers directly, except when there are employment or contractual arrangementsconsistent with section 1902(a)(32).

Service Definitions

Provide the state's definitions of the following Health Homes services and the specific activities performed under each service

Comprehensive Care Management

Definition

Comprehensive Care Management (CCM) in ACIST Health Homes willinclude the development of a treatment plan for areas impacted by the individual's mental health condition, consistent with the individual's DDDS person centered plan, for service provision based upon a comprehensivehistory and ongoing monitoring of:

- i. Psychiatric history, status, and previous diagnosis
- ii. IDD/Autism functional assessment
- iii. Individual outcomes as stated by the individual
- iv. Housing and living situation
- v. Vocational, educational, and social interests and capacities
- vi. Self-care abilities
- vii. Family and social relationships
- viii. Family education and support needs
- ix. Physical health
- x. Alcohol and drug use
- xi. Legal situation
- xii. Personal and environmental resources

Assessments will be completed within 30 days of admission. Individual goals, psychiatric evaluation and treatment will be reevaluated every 6-months. Treatment plans should also be re-evaluated any time a client experiences a significant life-event (e.g. hospitalization, death of a close friend or family member, significant changes in medications, etc.). Treatment plans will be strength-based, person-centered and will reflect individual preferences and key personal objectives. The plans will reflect a trauma-informed approach to supports.

CCM will also ensure the implementation of the treatment plan, including the seamless coordination of all health home functions and facilitating any necessary linkages to supports and services necessary for its effective implementation.

For individuals in ACIST Health Homes also receiving 1915(c) Lifespan-Waiver services, the treatment plan will be incorporated into the individuals' person-centered Life Span plan, and the health home team will be an integral partner in the shaping and delivery of services to ensureseamless integration across the spectrum of supports available to the individuals served.

Describe how Health Information Technology will be used to link this service in a comprehensive approach across the care continuum

ACIST Health Home providers will utilize electronic health records as required by the State of Delaware, enabling the integration of key health, social, and behavioral health data for all health home members. Treatment plan and related data metrics will be incorporated into this platform.

Scope of service

The service can be provided by the following provider types

- Behavioral Health Professionals or Specialists
- Nurse Practitioner
- Nurse Care Coordinators
- ∎ Nurses

- Medical Specialists
- Physicians
- Physician's Assistants
- Pharmacists
- Social Workers
- Doctors of Chiropractic
- Licensed Complementary and alternative Medicine Practitioners
- Dieticians
- Nutritionists
- Other (specify)

Provider Type	Description
Certified ACIST Health Home Provider	This HH component can be- completed by any ACIST team- member as most appropriate for the individual's symptom- presentation but will be- developed utilizing protocols- established and monitored by the team leader.

Care Coordination

Definition

Care Coordination is the implementation of the treatment plan with activemember involvement through appropriate linkages, referrals, coordination, and follow-up to needed services and supports. Care coordination is designed to be delivered in a flexible manner best suited to the individual and family's preferences and to support goals that have been identified by developing linkages and skills in order to allow health home members toreach their full potential and increase their independence in obtaining and accessing services. Care coordination duties include, but are not limited to: Coordinating with all team members to ensure all objectives of the comprehensive, treatment are progressing;

Scheduling and communicating appointment times, including arranging transportation and support if necessary;

Conducting referrals, facilitating linkages, and following up; Monitoring; and

Participating in hospital discharge processes and communicating with members/family enrollees and other providers, including, as applicable, DSHP Plus LTSS case management and service providers.

Health Home services shall not duplicate services available to individuals under the Medicaid State Plan. For individuals receiving LTSS, Delaware will institute strategies through the comprehensive planning process to ensure no duplication of comparable benefits.

Describe how Health Information Technology will be used to link this service in a comprehensive approach across the care continuum

ACIST Health Home providers will utilize electronic health records as required by the State of Delaware, enabling the integration of key health, social, and behavioral health data for all health home members.

Health Promotion

Definition

Health promotion services include

- Encouraging and supporting health education for the

member/family/support persons

 Coaching members/family/support persons about chronic conditions and ways to manage health conditions based on the member's preferences

- Connecting the member to self-care programs to help increase their understanding of their conditions and care plan

- Promoting engagement of the member and family/support persons in self-management and decision making

- Encouraging and facilitating routine preventive care such as flu shots and cancer screenings

- Linking the member to resources for smoking cessation management of member chronic conditions; self-help recovery resources; and other services based on member needs and preferences

 Assessing the member's and family/support persons' understanding of the member's health condition and motivation to engage in selfmanagement Health promotion may include the following elements:

- Mental health symptom management and mediation

- Individual counseling and/or behavior analysis as indicated in the individual's treatment plan

- Medication, monitoring, education and documentation

 Addiction treatment and education including counseling, relapse prevention, harm reduction,

Anger and stress management, if appropriate

Health Home services shall not duplicate services available to individuals under the Medicaid State Plan. For individuals receiving LTSS, Delaware will institute strategies through the comprehensive planning process to ensure no duplication of comparable benefits.

Describe how Health Information Technology will be used to link this service in a comprehensive approach across the care continuum

ACIST Health Home providers will utilize electronic health records as required by the State of Delaware, enabling the integration of key health, social, and behavioral health data for all health home members.

For service components requiring- clinical skillsets, the appropriate team member will carry out- and/or oversee those specific- elements.

Comprehensive Transitional Care from Inpatient to Other Settings (including appropriate follow-up)

Definition

The health home team will maintain continued contact with individualsduring inpatient or other setting stays to help insure greater continuity ofservice both within the facility and upon discharge from the facility. Plansfor transition back to community-based settings, including necessaryclinical support throughout transition, will be initiated immediately uponadmission in partnership with facility discharge planners and any providers of LTSS. The team of the individual hospitalized must meet with the clientmultiple times per week during acute admissions throughout theirinpatient stay and have periodic planning sessions with the client'streatment team/treating medical professionals. ACIST team receives allrelevant discharge information and facilitates all necessary appointmentsand/or coordination of services pursuant to those instructions.

At a minimum, the HH will:

• utilize hospitalization or emergency department episodes to locate and engage members in need of HH services;

 perform the required continuity of care coordination between inpatient and outpatient care, including establishment or reestablishment of community resources and necessary follow-up visits; and
 engage in proactive steps to avoid readmission (including work with the individual and his/her family and analysis of antecedent activities to

interrupt patterns of inpatient utilization)

HHs will have a clear protocol for responding to alerts from hospitals or any other inpatient facility to facilitate collaboration in treatment, discharge, and safe transitional care. Services as part of beneficiary contacts during transitions include but are not limited to:

a) Assisting in the development of discharge strategies;

- b) Performing medication reconciliation;
- c) Ensuring that follow-up appointments are scheduled and coordinated;
 d) Assessing the patient's risk status tor readmission to the hospital or other failure to obtain community-based care;

e) Arranging for follow-up care management, as applicable and f) Planning appropriate care/place to stay post-discharge, includinglinkages to temporary or permanent housing and arranging transportation as needed.

Health Home services shall not duplicate services available to individuals under the Medicaid State Plan. For individuals receiving LTSS, Delaware will institute strategies through the comprehensive planning process to ensure no duplication of comparable benefits.

Describe how Health Information Technology will be used to link this service in a comprehensive approach across the care continuum

ACIST Health Home providers will utilize electronic health records as required by the State of Delaware, enabling the integration of key health, social, and behavioral health data for all health home members.

Monitoring

Describe the state's methodology for calculating cost saving (and report cost savings annually in Quality Measure Report). Include savings that result from improved coordination of care and chronic disease management achieved through the Health Homes Program, including data sources and measurement specifications, as well as any savings associated with dual eligibles, and if Medicare data was available to the state to utilize in arriving at its cost-savings estimates

Delaware will calculate and monitor cost savings through a number of mechanisms. For individuals with an established Medicaid claim history, cost savings data will be calculated by comparing current year withhistorical costs for individuals. For individuals without established claims history, the state will determine a projected service utilization trajectory using data from individuals with similar presentation and symptoms to ascertain the cost avoidance achieved through the health homeintervention. In addition, Delaware will include an analysis of individualoutcomes to demonstrate the value provided through the health homes (employment, housing stability, etc).

Describe how the state will use health information technology in providing Health Homes services and to improve service delivery and coordination across the care continuum (including the use of wireless

patient technology to improve coordination and management of care and patient adherence to recommendations made by their provider)

The State will require that participating health homes providers use an operational Electronic Health Record (EHR) system to support the delivery of health home services. This EHR will be prescribed by the state and will include individual health statistics, service utilization, risk assessments, and comprehensive person-centered plan information. The EHR enables data sharing (with appropriate permissions) among the individual, the providers supporting him/her, and the state to ensure a comprehensive, whole-person record of support. The system will include critical health information including pharmacology to ensure complete integration of physical health, behavioral health and long -term services and supports. The system will also include information on what is important to the individual in addition to what is important for the individual, ensuring that supports and services and undertaken with an understanding of personal preferences.

This system will enable real time access to data to inform linkages to needed social supports and other determinants of health. It will foster and further seamless transitions when individuals experience inpatient encounters, and will ensure full team access to all necessary information.

Quality Measurement and Evaluation

The state provides assurance that all Health Homes providers report to the state on all applicable quality measures as a condition of receivingpayment from the state

The state provides assurance that it will identify measureable goals for its Health Homes model and intervention and also identify qualitymeasures related to each goal to measure its success in achieving the goals

The state provides assurance that it will report to CMS information submitted by Health Homes providers to inform evaluations, as well as Reports to Congress as described in Section 2703(b) of the Affordable Care Act and as described by CMS

The state provides assurance that it will track avoidable hospital readmissions and report annually in the Quality Measures report PRA Disclosure Statement: According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-1188. The time required to complete this information collection is estimated to average 40 hours per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, Attn: PRA Reports Clearance Officer, Mail Stop C4-26-05, Baltimore, Maryland 21244-1850.
