CITIZEN PARTICIPATION IN THE REGULATORY PROCESS

Delaware citizens and other interested parties may participate in the process by which administrative regulations are adopted, amended or repealed, and may initiate the process by which the validity and applicability of regulations is determined.

Under 29 Del.C. §10115 whenever an agency proposes to formulate, adopt, amend or repeal a regulation, it shall file notice and full text of such proposals, together with copies of the existing regulation being adopted, amended or repealed, with the Registrar for publication in the Register of Regulations pursuant to §1134 of this title. The notice shall describe the nature of the proceedings including a brief synopsis of the subject, substance, issues, possible terms of the agency action, a reference to the legal authority of the agency to act, and reference to any other regulations that may be impacted or affected by the proposal, and shall state the manner in which persons may present their views; if in writing, of the place to which and the final date by which such views may be submitted; or if at a public hearing, the date, time and place of the hearing. If a public hearing is to be held, such public hearing shall not be scheduled less than 20 days following publication of notice of the proposal in the Register of Regulations. If a public hearing will be held on the proposal, notice of the time, date, place and a summary of the nature of the proposal shall also be published in at least 2 Delaware newspapers of general circulation. The notice shall also be mailed to all persons who have made timely written requests of the agency for advance notice of its regulation-making proceedings.
The opportunity for public comment shall be held open for a minimum of 30 days after the proposal is published in the Register of Regulations. At the conclusion of all hearings and after receipt, within the time allowed, of all written materials, upon all the testimonial and written evidence and information submitted, together with summaries of the evidence and information by subordinates, the agency shall determine whether a regulation should be adopted, amended or repealed and shall issue its conclusion in an order which shall include: (1) A brief summary of the evidence and information submitted; (2) A brief summary of its findings of fact with respect to the evidence and information, except where a rule of procedure is being adopted or amended; (3) A decision to adopt, amend or repeal a regulation or to take no action and the decision shall be supported by its findings on the evidence and information received; (4) The exact text and citation of such regulation adopted, amended or repealed; (5) The effective date of the order; (6) Any other findings or conclusions required by the law under which the agency has authority to act; and (7) The signature of at least a quorum of the agency members.

The effective date of an order which adopts, amends or repeals a regulation shall be not less than 10 days from the date the order adopting, amending or repealing a regulation has been published in its final form in the Register of Regulations, unless such adoption, amendment or repeal qualifies as an emergency under §10119.

Any person aggrieved by and claiming the unlawfulness of any regulation may bring an action in the Court for declaratory relief.

No action of an agency with respect to the making or consideration of a proposed adoption, amendment or repeal of a regulation shall be subject to review until final agency action on the proposal has been taken.

When any regulation is the subject of an enforcement action in the Court, the lawfulness of such regulation may be reviewed by the Court as a defense in the action.

Except as provided in the preceding section, no judicial review of a regulation is available unless a complaint therefor is filed in the Court within 30 days of the day the agency order with respect to the regulation was published in the Register of Regulations.

6.0 Reinsurance Payments

6.1 A reinsurance eligible issuer becomes eligible for a reinsurance payment when the claims costs for at least one reinsurance eligible individual's covered benefits in a calendar year exceed the attachment point.

6.2 Under the intergovernmental agreement with CMS, the Executive Director shall calculate a reinsurance payment from CMS reports detailing the total payments owed to each reinsurance eligible issuer.

6.2.1 Subject to subsections 6.2.2 and 6.2.3, the reinsurance payment made to each reinsurance eligible issuer for a benefit year will be the product of the coinsurance rate and the portion of the reinsurance eligible issuer’s total reinsurance eligible claims for the benefit year that fall between the attachment point and the reinsurance cap.

6.2.2 The Executive Director shall uniformly reduce or increase the coinsurance rate to the extent necessary, but at no time shall the increase exceed 100%, to ensure that reinsurance payments do not exceed the total available funding for the benefit year, as determined by the Executive Director in his or her sole discretion.

6.2.3 In making the calculation under subsection 6.2.1, the Executive Director in his or her sole discretion may disregard any or all reinsurance eligible claims reported by a reinsurance eligible issuer under Section 4.0 that cannot be verified as part of the audit described under subsection 7.1.

6.3 The program shall issue reinsurance payments to all reinsurance eligible issuers on an annual basis in the year following each benefit year. The Executive Director shall issue a payment schedule to all issuers.

6.4 Payments shall be made directly to reinsurance eligible issuers by a method designated by the Executive Director.

6.5 If the Executive Director determines that a reinsurance eligible issuer has substantively failed to comply with this regulation, he or she shall give notice thereof to the issuer stating the Executive Director’s findings and stating how the nonconformance can be remedied. The Executive Director shall specify a time period for remedying the nonconformance. The program shall not issue reinsurance payments until the nonconformance is remedied.

7.0 Duties of the Administrator

7.1.3 Issue reinsurance payments to each reinsurance eligible issuer in accordance with Section 6.0.

7.1.4 Assign the functions vested in him or her by the Delaware Health Insurance Individual Market Stabilization Reinsurance Program and these regulations to subordinate officers and employees as he or she deems necessary. The designee shall have the same power and authority that would be afforded to the Executive Director.

7.1.6 Use, access, store, and disclose the information submitted to the program under Section 4.0, including disclosing the information to the Insurance Commissioner, in accordance with applicable state and federal confidentiality laws, for the purposes of ensuring the efficient administration of the program and to reduce the reporting burden on issuers.

8.2 The Executive Director may audit a reinsurance eligible issuer to assess its compliance with the requirements of this regulation. The reinsurance eligible issuer must ensure that its relevant contractors, subcontractors, or agents cooperate with any audit under this Section. If an audit results in a finding of material weakness or significant deficiency with respect to compliance with any requirement of this Section, the reinsurance eligible issuer must complete all of the following:

**Background**
On December 4, 2018, Delaware Governor John Carney signed Executive Order 27. This executive order established The Delaware Correctional Reentry Commission (DCRC) with the objective of effectively coordinating services for the recently released, strengthening data sharing among state agencies, and improving the availability of programming prior to an inmate’s release in hopes of reducing recidivism.

In June 2018, DMMA, in collaboration with other state agencies, including the Delaware Division of Substance Abuse and Mental Health, the Division of Social Services, and the Department of Corrections, held the first Justice Involved Individuals Steering Committee meeting, to develop a plan to facilitate access to covered Medicaid services for eligible individuals immediately upon release from a correctional institution.

On July 31, 2019, the Centers for Medicare & Medicaid Services (CMS) approved Delaware’s request for extension and amendment of its Medicaid demonstration project entitled, "Diamond State Health Plan" for beneficiaries beginning the month they submit an application, and to waive the three month retroactive eligibility period.

As a result of the approval of the Medicaid 1115 Waiver, retroactive coverage is potentially available, if general financial and technical eligibility requirements are met, to the following groups: Pregnant women, including during the 60-day postpartum period beginning on the last day of pregnancy; infants under age 1; and individuals under age 19 (listed separately from the group above due to the different income limits).

The changes to the streamline application are to reflect changes to include questions for the justice-involved population and retroactive eligibility.

In compliance with the State’s Administrative Procedures Act (APA - Title 29, Chapter 101 of the Delaware Code), 42 CFR §447.205, and under the authority of 31 Del. C. § 512, Delaware Health and Social Services (DHSS) / Division of Medicaid and Medical Assistance (DMMA) is proposing to amend Title XIX Medicaid State Plan regarding Medication-Assisted Treatment (MAT) to move coverage of the MAT benefit from the optional services sections of the Medicaid State Plan to the mandatory services section of the Medicaid State Plan for categorically needy populations, per federal requirements.

Any person who wishes to make written suggestions, compilations of data, testimony, briefs, or other written materials concerning the proposed new regulations must submit same to Planning, Policy and Quality Unit, Division of Medicaid and Medical Assistance, 1901 North DuPont Highway, P.O. Box 906, New Castle, Delaware.
The purpose of this notice is to advise the public that Delaware Health and Social Services (DHSS)/Division of Medicaid and Medical Assistance (DMMA) is proposing to amend Title XIX Medicaid State Plan regarding Medication-Assisted Treatment (MAT) to move coverage of the MAT benefit from the optional services sections of the Medicaid State Plan to the mandatory services section of the Medicaid State Plan for categorically needy populations, per federal requirements.

Statutory Authority

- Section 1905(a)(29) of the Social Security Act
- Section 1006(b) of the Substance Use-Disorder Prevention that Promotes Opioid Recovery and Treatment (SUPPORT) Act

Background

Section 1006(b) of the SUPPORT Act, signed into law on October 24, 2018, amends section 1902(a)(10)(A) of the Social Security Act (the Act) to require state Medicaid plans to include coverage of MAT for all eligible to enroll in the state plan or waiver of state plan. States are also required to cover counseling services and behavioral therapies associated with provision of the required drug and biological coverage. States that already use existing Medicaid authorities to cover items and services that will now be covered under the new mandatory MAT benefit, including FDA-approved or licensed drugs and biologicals used for MAT to treat Opioid Use Disorder (OUD), and associated counseling services and behavioral therapies, are expected to submit a State Plan Amendment (SPA) to move their coverage of these items and services to a new page in their Medicaid state plans for the new mandatory benefit at section 1905(a)(29) of the Act. Delaware currently covers MAT as an optional benefit and is publishing this regulation so as to move this coverage from an optional benefit to a mandatory benefit.

Upon receipt of the State Health Official dated December 30, 2020, issuing guidance about the requirements of section 1006(b), Delaware submitted a modification request of SPA submission requirements at 42 C.F.R. 430.20 in order to submit a SPA implementing section 1905(a)(29) of the Act by March 31, 2021 that would take effect on October 1, 2020. Pursuant to section 1135(b) of the Act, Delaware requested modification of the public notice time frames set forth at 42 C.F.R. 447.205 in order to obtain an effective date of October 1, 2020.

Outpatient activities are delivered on an individual or group basis in a wide variety of settings including site-based facility, in the community or in the beneficiary's place of residence. These services may be provided on site or on a mobile basis as defined by Delaware Health and Social Services (DHSS) or its designee. The setting will be determined by the goal which is identified to be achieved in the beneficiary's written treatment plan. Outpatient services may be indicated as an initial modality of care for a beneficiary whose severity of illness warrants this level of treatment, or when a beneficiary's progress warrants a less intensive modality of service than they are currently receiving. The intensity of the services will be driven by medical need. Medication Assisted Therapies (MAT) should only be utilized when a beneficiary has an established SUD (e.g., opiate or alcohol dependence condition) that is clinically appropriate for MAT.

Provider qualifications: Outpatient addiction services are provided by licensed and unlicensed professional staff who are at least eighteen (18) years of age with a high school or equivalent diploma, according to their areas of competence as determined by degree, required levels of experience as defined by state law and regulations and approved program guidelines and certifications approved by DHSS or its designee. All outpatient substance use disorder (SUD) programs are licensed or certified under state law. Licensed practitioners under Delaware state regulation are licensed by Delaware and include Licensed Clinical Social Workers (LCSWs), Licensed Professional Counselors of Mental Health (LPCMH), Licensed Marriage and Family Therapists (LMFTs), nurse practitioners (NPs), advanced practice nurses (APNs), medical doctors (MD and DO), Licensed Chemical Dependency Professionals (LCDPs), and psychologists.
Residential Addiction Services

MAT may be provided as part of residential services which include individual-centered residential services consistent with the beneficiary's assessed treatment needs, with a rehabilitation and recovery focus designed to promote skills for coping with and managing substance use disorder symptoms and behaviors. These services are designed to help beneficiaries achieve changes in their substance use disorder behaviors. Services should address the beneficiary's major lifestyle, attitudinal, and behavioral problems that have the potential to undermine the goals of treatment. Residential SUD services include medically necessary care according to assessed needs including the four (4) component activities: (1) Assessment and clinical treatment plan development – The purpose of the assessment is to provide sufficient information for problem identification, SUD treatment or referral for the beneficiary to gain access to other needed Medicaid SUD or mental health services. The treatment plan for Medicaid SUD or mental health services must be patient-centered and developed in collaboration with the patient; (2) Skill development for coping with and managing symptoms and behaviors associated with substance use disorders (SUD) such as the participant's perspective and lack of impulse control or signs and symptoms of withdrawal; (3) Counseling to address a beneficiary's major lifestyle, attitudinal, and behavioral problems. Counseling includes highly structured psychosocial therapy to address issues that have the potential to undermine the goals of treatment; (4) Medication Assisted Therapies (MAT) when clinically appropriate and desired by the patient, including the direct administration of medication. Residential services are delivered on an individual or group basis in a wide variety of settings including treatment in residential settings of sixteen (16) beds or less designed to help beneficiaries achieve changes in their substance use disorder behaviors.

Provider qualifications: Services are provided by licensed and unlicensed professional staff, who are at least eighteen (18) years of age with a high school or equivalent diploma, according to their areas of competence as determined by degree, required levels of experience as defined by state law and regulations and departmentally approved program guidelines and certifications. All residential programs are licensed or certified under state law per Delaware Administrative Code Title 16.6001. I. SUMMARY OF THE EVIDENCE AND INFORMATION SUBMITTED

In compliance with the State's Administrative Procedures Act (APA - Title 29, Chapter 101 of the Delaware Code) and under the authority of Title 3 of the Delaware Code, Chapter 9, Section 904(b)(20) and (21), the Agricultural Lands Preservation Foundation (the "Foundation") seeks to amend the regulations governing the Delaware Agricultural Forestlands Preservation Program. These regulations are being amended to create a more efficient and flexible application and appraisal process by eliminating the references to unnecessary form information and review procedures. The amendment also eliminates the bonus for properties located in a State Resource Area (SRA) and replaces it with a bonus for properties located in a Forest Legacy Area (FLA). Other changes are typographical or were made to bring the regulation into compliance with the Delaware Administrative Code Drafting and Style Manual.

Notice of the proposed regulation was published in the Delaware Register of Regulations on November 1, 2020, in the form hereto attached as Exhibit "A". The proposed regulation was presented at a virtual public hearing on November 24, 2020. No formal comments were received from members of the public at that time. Pursuant to Delaware law, the record remained open for fifteen (15) days subsequent to the date of the public hearing for the purpose of allowing additional public comment to be received regarding this matter. The hearing record closed for comment on December 9, 2020, with no public comment having been received during any phase of this matter.
II. FINDINGS OF FACT

The Foundation finds that the elimination of the references to unnecessary form information and review procedures will create a more efficient and flexible application and appraisal process for landowners seeking to submit their property for consideration under the Delaware Agricultural Forestlands Preservation Program. In addition, the Foundation finds that the proposed amendments correcting typographical errors and stylistic changes to conform to the drafting guidelines are appropriate. Accordingly, the Foundation finds that it is appropriate to amend 3 DE Admin. Code 702 Regulations Governing the Delaware Agricultural Forestlands Preservation Program.

III. DECISION TO AMEND THE REGULATION

For the foregoing reasons, the Foundation concludes that it is appropriate to amend 3 DE Admin. Code 702 Regulations Governing the Delaware Agricultural Forestlands Preservation Program. Pursuant to 14 Del.C. §122(a) and 29 Del.C. §7528, the Secretary of Education intends to amend 14 DE Admin. Code 401 Major Capital Improvement Program. This amendment is needed to comply with a court order that directs the Department of Education to amend 14 DE Admin. Code 401 Major Capital Improvement Program to require school districts to provide an Equity Statement in connection with a request for Issuance of a Certificate of Necessity. It is also being amended to make grammatical changes per the Delaware Administrative Code Drafting and Style Manual.

Notice of the proposed regulation was published in the Delaware Register of Regulations on January 1, 2021. In addition, notice was published in The News Journal and the Delaware State News on January 1, 2021, in the form hereto attached as Exhibit "A". The Department is unable to include such language as this regulation only covers grades K-12 within public schools as outlined in 14 Delaware Code and 29 Delaware Code.

Code 401 Major Capital Improvement Program attached hereto as Exhibit "B" is hereby amended. Pursuant to the provision of 14 Del.C. §122(e), 14 DE Admin. Code 401 Major Capital Improvement Program hereby amended shall be in effect for a period of five years from the effective date of this order as set forth in Section V. below.

DEPARTMENT OF NATURAL RESOURCES AND ENVIRONMENTAL CONTROL
DIVISION OF AIR QUALITY

Statutory Authority: 7 Delaware Code, Sections 6001(c) and 6010; (7 Del.C. §§6001(c) and 6010)

SECRETARY’S ORDER NO.: 2021-A-0005

Date of Issuance: February 15, 2021

Effective Date of the Amendment: March 11, 2021

1151 Prohibitions on Use of Certain Hydrofluorocarbons in Specific End-Uses

Under the authority vested in the Secretary of the Department of Natural Resources and Environmental Control ("Department" or "DNREC"), pursuant to 7 Del.C. §§6006 and 6010, and all other relevant statutory authority, the following findings of fact based on the record, reasons and conclusions are entered as an Order of the Secretary in the above-referenced promulgation.

Background, Procedural History and Findings of Fact

This Order relates to the Department's proposed new regulation to be codified in the Delaware Administrative Code as follows: 7 DE Admin. Code 1151: Prohibitions on Use of Certain Hydrofluorocarbons in Specific End-Uses
The Department's objective of this proposed action is to regulate the use and manufacturing of hydrofluorocarbons ("HFCs") through this promulgation. This regulatory development process was initiated pursuant to the Governor's Directive on Delaware to Eliminate HFCs to Confront Climate Change (June 30, 2019), and House Concurrent Resolution 60 (Passed June 30, 2019), requiring the Department to regulate the manufacturing and use of HFCs in Delaware.

The proposed HFC Regulation establishes the prohibitions and requirements for the use and manufacture of HFCs in the State of Delaware, according to their specific end usage, which includes air conditioning and refrigeration equipment, aerosol propellants, and foam-end uses, and adopts specific United States Environmental Protection Agency ("EPA") Significant New Alternatives Policy Program ("SNAP") prohibitions. The proposed new HFC Regulation is also designed to support Greenhouse Gas ("GHG") emission reductions in the State of Delaware, and to offer Delawareans an increasing quality of life through the reduction of air pollution, increased economic opportunities, and mitigation of the detrimental effects of climate change. Currently, through Governor Carney's commitment to participate in achieving the goals of the United States Climate Alliance, Delaware has committed to reduce its GHG emissions by 26 to 28% by 2025, compared to 2005 levels.

As HFC emissions are growing at a rapid rate in Delaware, the proposed new HFC Regulation is an important part of achieving Delaware's GHG reduction goals, as well as mitigating the environmental, social, and health risks related to climate change. Climate change poses a significant threat especially to Delaware as a coastal state, which has the lowest average elevation in the country. Many of Delaware's industries and infrastructure are vulnerable to the effects of climate change, including, but certainly not limited to, tourism, real estate, agriculture, wastewater, and transportation. Further, human health, air and water quality, and ecosystems are all at increasing risk with the strengthening consequences of climate change.

To serve as background, HFCs are gaseous compounds used across various economic sectors in applications for air conditioning, refrigeration, foam-blowing, solvents, and aerosols. HFCs were identified in the 2009 GHG Endangerment Finding by EPA as one of six GHGs in the atmosphere that "threaten the public health and welfare of current and future generations." As noted above, HFC emissions are GHGs that can have a warming effect that is hundreds to thousands times that of carbon dioxide ("CO₂").

HFCs were originally introduced as substitution ozone-depleting substances ("ODS"), within the same applications, as part of the phase-out established in accordance with the Montreal Protocol, a landmark multilateral environmental agreement adopted by the United Nations on September 15, 1987 that regulates the production and consumption of nearly 100 man-made chemicals (referred to therein as ODS). When released to the atmosphere, the ODS damage the stratospheric ozone layer, Earth's protective shield that protects humans and the environment from harmful levels of ultraviolet radiation from the sun.

The Montreal Protocol phases down the consumption and production of the different ODS in a stepwise manner, with different timetables for developed and developing countries. Under this treaty, all parties have specific responsibilities related to the phase out of the different groups of ODS, control of ODS trade, annual reporting of data, national licensing systems to control ODS imports and exports, and other related matters. The treaty evolves over time, in light of new scientific, technical and economic developments, and it continues to be amended and adjusted. Under the Montreal Protocol, chlorofluorocarbons ("CFCs") were recognized as ODS, and the EPA defined a phase-out schedule for the different classes of ODS (Class I and Class II). The phase-out targets the ODS that are produced or imported in the country, and the original schedule was amended over time.

HFCs were developed to address the phase-out of HCFCs¹ (same applications), however, they were recognized as GHGs with high Global Warming Potentials ("GWPs"). Because of the increasing urgency of climate action, the Kigali Amendment to the Montreal Protocol requires the participating countries to cut their production and consumption of HFCs by more than 80% by 2050.

¹ Hydrofluorocarbons ("HFCs") is defined in Section 3.0 as “a class of greenhouse gases that are saturated organic compounds containing hydrogen, fluorine, and carbon.” Hydrochlorofluorocarbons ("HCFCs") are not covered under this regulation, and thus were not formally defined within the HFC Regulation. For clarification, however, the EPA defines HCFCs as “a compound consisting of hydrogen, chlorine, fluorine, and carbon. HCFCs contain chlorine, and thus deplete stratospheric ozone, with ozone depletion potentials ranging from 0.01 to 0.1. HCFCs were used in a wide variety of applications, including refrigeration, air conditioning, foam blowing, solvents, and more, and are subject to a phase-out schedule.
While the United States did not ratify the Kigali Amendment, references to the same are contained within both the Department's Technical Support Document and its Regulatory Impact Statement. The reference was made to emphasize the international interest in the phase-down of high GWP HFCs, and to express the need for industry in the United States to adopt similar restrictions to remain competitive while assuring emissions reductions in a critical segment of GHGs.

The EPA sought to phase-down the use and manufacturing of these high GWP pollutants through its SNAP program. On August 8, 2017, the United States Court of Appeals for the District of Columbia Circuit limited EPA's ability to require replacement of HFCs (Mexichem v. EPA, No.15-1328, Aug. 8, 2017). The Court subsequently clarified its previous ruling with regard to EPA's authority to require a second substitution in place of HFCs (Nat.Res.Def. Council v. Wheeler, et al., No. 18-1172, April 7, 2020). Although legal actions remain ongoing at the federal level to defend the SNAP rules, state action is required at this time to maintain HFCs' prohibitions schedule, in line with the vacated SNAP rules.

With regard to applicability, the proposed HFC Regulations will establish prohibitions for any person who sells, offers for sale, leases, rents, installs, uses or manufactures in the State of Delaware, any product or equipment that uses a substance in any of the end-uses listed under the list of prohibited substances covered by the proposed regulation. As a flexibility mechanism, the Department has proposed language to allow the use of product or equipment containing a prohibited substance if the product or equipment was acquired prior to the applicable effective date of prohibition, unless an existing system is retrofit. Additionally, the Department has proposed regulatory language to clarify that, unless an operation constitutes a retrofit or reclassifies a system as "new," the proposed HFC Regulations do not prevent the use of a prohibited substance in the servicing, maintenance and repair operations of existing equipment, in any end-use covered by the proposed new regulation. The Department has also proposed language to allow the importation, exportation, installation, and use of product or equipment containing a prohibited substance after the specified date of prohibition, only if the product or equipment was manufactured prior to the applicable date of prohibition.

The Department has listed each prohibited substance and the effective date of its prohibition, according to its specific end-use, in its Technical Support Document dated April 2020 (see p.9, Part III, Section B, Table 2), that was entered into the hearing record ("Record") as one of the Department's Exhibits at the time of the public hearing held on April 23, 2020. The prohibitions and effective dates detailed in the proposed new regulation were informed by the EPA SNAP Rules 20 and 21 (intended phase-down schedule for the different substances), which took into consideration many economic constraints for the industry, along with the availability of viable and cost-effective low GWP alternatives. It should be noted that the prohibition dates were subsequently revised under the proposed new regulation, to accommodate for the time necessitated for the Department's regulatory development process.

Additionally, the Department has allowed a one-year extension (revised to January 1, 2022) for the new vending machine end-use category, before the effective date of prohibition for all substances covered under this end-use. This extension resulted from industry stakeholders informing the Department that the current preferred low GWP refrigerant alternative (R-290) for the vending machine industry is currently designated as a flammable chemical (A-3) by the American Society of Heating, Refrigerating and Air-Conditioning Engineers, Inc. ("ASHRAE"), Guideline 34. UL2 541 and ASHRAE 15 have authority over products containing this chemical and their placement within buildings, and pursuant to these requirements, in the United States, vending machines with any refrigerant other than A1 (non-flammable) classification may not be placed in locations of ingress, egress, hallways, or lobby areas of any buildings, at the risk of severe liabilities in case of incident3. During the course of the Department's regulatory development process for this promulgation, the industry informed the Department of the current work with UL and ASHRAE that may allow R-290 to work within the safety standards, by modifying UL541 and ASHRAE 15. For these reasons, the Department is proposing to allow the industry a one-year extension to establish their compliance pathway.

2 UL (Underwriters Laboratories) is a standards-setting organization that develops and publishes consensus standards that guide the safety, performance and sustainability for industries from household appliances to batteries to environment, to cybersecurity to building materials.

3 UL 541 and ASHRAE 15 refer to specific standards set by external standard-setting organizations (i.e., UL, ASHRAE) that some manufacturers, covered in this regulation, already comply with and that include considerations that informed the rulemaking development (i.e., safety, flammability, and labeling standards).
The proposed HFC Regulations also establish disclosure requirements for manufacturers of the products and equipment covered under the new regulation. By requiring a disclosure statement or label to be available to the buyer of products and/or equipment covered under this proposed new regulation, the Department aims to ensure that the buyer can verify that their purchase follows State regulations. Furthermore, in setting the disclosure statement requirements, the Department is proposing language to allow flexibility for managers to comply, while offering customers transparent and easily accessible information regarding their purchase.

The Department has the statutory basis and legal authority to promulgate new regulations, specifically, to regulate the use of HFCs in Delaware with the proposed 7 DE Admin. Code 1151: Prohibitions on Use of Certain Hydrofluorocarbons in Specific End-Uses, pursuant to 7 Del.C. §§6001(c) and 6010, which authorize the Department to adopt rules to control air pollution as necessary to protect the public health, safety, and welfare. As previously noted, this new regulation was developed by the Department, pursuant to the Governor's Directive on Delaware to Eliminate HFCs to Confront Climate Change (June 30, 2019), and House Concurrent Resolution 60 (Passed June 30, 2019), which requires the Department to regulate the manufacturing and use of HFCs in Delaware.

The Department published the initial proposed new HFC Regulations in the April 1, 2020 Delaware Register of Regulations. Thereafter, the virtual public hearing regarding this matter was held on April 23, 2020. Members of the public attended the April 23, 2020 virtual public hearing. Due to the level of public interest in this matter, the Record remained open for receipt of public comment subsequent to the hearing through May 31, 2020. All proper notification and noticing requirements concerning this matter were met by the Department. Proper notice of the hearing was provided as required by law.

Written comment was received by the Department concerning this proposed new regulation, during both the pre- and post-hearing phases of this promulgation. Subsequent to the close of the Record, the Department's Division of Air Quality ("DAQ") prepared a Technical Response Memorandum ("TRM"), at the request of Hearing Officer Lisa A. Vest. This TRM, dated June 25, 2020, provides a summary of the comments received by the Department, and responses to the written comments received from the public concerning the proposed new HFC Regulations.

Subsequent to the close of the public comment period, the Polyisocyanurate Insulation Manufacturers Association ("PIMA") provided the DAQ with its comments that were submitted to the EPA regarding the EPA SNAP Proposed Rule 23 (for which a Notice of Proposed Rulemaking was released by EPA on June 12, 2020). These supplemental comments were provided to DAQ by PIMA as a courtesy, so that the Department would be aware of this submission, and to provide DAQ with additional information on not only the proposed EPA SNAP Rule 23, but also PIMA's concerns as to the availability of commercialized products with low GWP formulations for covered end-uses in the global markets. The DAQ provided Hearing Officer Vest with a Supplemental TRM, dated August 5, 2020, for the benefit of the Record generated in this matter, and to specifically acknowledge receipt of PIMA's additional submission regarding this promulgation.

Hearing Officer Vest prepared her Hearing Officer's Report, dated February 8, 2021 ("Report"), which expressly incorporated into the Record the following documents: (a) the Department's revised proposed new HFC Regulation; (b) the Department's Technical Support Memorandum (April 2020); (c) DAQ's initial TRM (June 25, 2020); (d) DAQ's Supplemental TRM (August 5, 2020); and (e) Summary Sheet of all proposed revisions to the HFC Regulations, and attached the same to her Report as Appendices "A" through "E," respectively. The Report documents the proper completion of the required regulatory development process, establishes the Record, and recommends the adoption of the Department's revised proposed new HFC Regulation, as attached to the Report as Appendix "A."

Reasons and Conclusions

The new HFC Regulation proposed by the Department is to establish the prohibitions and requirements for the use and manufacture of HFCs in the State of Delaware, according to their specific end usage, which includes air conditioning and refrigeration equipment, aerosol propellants, and foam-end uses, and to adopt specific EPA SNAP prohibitions. The proposed HFC Regulation is also designed to support GHG emission reductions in the State of Delaware, and to offer Delawareans an increasing quality of life through the reduction of air pollution, increased economic opportunities, and mitigation of the detrimental effects of climate change.

With regard to the comments received by the Department that suggest the proposed new regulation will only add financial burden to Delawareans, DAQ notes in its TRM of June 25, 2020 that many flexible mechanisms have
been included in the language of the proposed new regulation to minimize the burden on Delaware's residents and small businesses. First, this regulation does not include recordkeeping requirements, nor does it cover motor vehicle air conditioning end-uses or household equipment. Most of the compliance burdens are expected to rest on manufacturers of the regulated products and equipment, which are, in majority, large enterprises.

Additionally, the proposed new regulation does not require users to cease the use of their equipment or product(s) acquired prior to its effective date of prohibition, unless said equipment is retrofit or classified (or reclassified) as new. The proposed regulation also allows for any covered equipment or product manufactured prior to the applicable effective date of prohibition to be sold, imported, exported, distributed, installed and used after its effective date of prohibition.

Additionally, DAQ's aforementioned TRM notes that the variable difference in capital expenses, when replacing conventional equipment with equipment that is in compliance with the proposed new regulation, is projected to decrease as the economies of scale set in (as the demand for low GWP alternatives grows at the global scale). Thus, most small businesses that will change their equipment as part of the regular life cycle of their operations are likely to pay lower or smaller incremental costs over time. To encourage and accelerate the transition to low GWP, the Department has also designed an incentives program, the Cool Switch Low Impact Refrigerant Program, that will help pay the upfront cost of the new or retrofitted equipment using low GWP refrigerants.

Moreover, the aforementioned TRM notes that, according to the EPA SNAP Rules 20 and 21 screening analyses, the probability of having one small business in Delaware incurring costs in excess of 1% or 3% of their revenues, on a population basis, is less than 0.0003%. Based on this estimate, and DAQ's strong stakeholder engagement process which prompted the inclusion of the flexibility mechanisms detailed above, the Department believes that the proposed new HFC Regulation is unlikely to add substantive financial burden to Delawareans.

The written comments received from the regulated community concerning this proposed promulgation are fully responded to, in detail, within DAQ's initial TRM referenced above. It should be noted that the Department will be developing a guidance document to assist the regulated community with regard to compliance issues associated with this new regulation. This guidance document will include, but will certainly not be limited to, the acceptable formats for disclosure statements for the covered end-uses; considerations for the easily recognizable date code formats; and considerations for how to treat the exemptions listed under Section 7.0 (in terms of disclosure statement requirements).

In comments submitted to the Department by the American Chemistry Council (“ACC”) Center for the Polyurethanes Industry (“CPI”), suggestions were made for modifications of eleven stated definitions, as contained within the initially proposed HFC Regulations, plus the addition of one new definition. Honeywell Fluorine Products, another commenter that congratulated Delaware's initiative to regulate HFCs in a consistent manner with other States and agreed with the necessity to transition away from high GWP HFCs (and further commented that technologies using environmentally preferable HFC alternatives are often also more energy efficient than traditional systems, thus offering lower customer costs and increased competitiveness), also supported changes to the polyurethane and foam end-uses definitions as suggested by ACC CPI.

Subsequent to the close of the public comment period in this matter, the Department received input from Paul Ashford, an expert from the United Nations Environment Programme's (“UNEP”) Foams Technical Options Committee (“FTOC”). Mr. Ashford is also listed as one of the co-authors of the latest 2018 FTOC reports from UNEP. Mr. Ashford has provided DAQ with suggestions that clarify the proposed definitions as set forth in the HFC Regulations. The DAQ's TRM notes that the Department believes other states are in the process of adopting similar regulations that will include these definition clarifications. The TRM further notes that the USCA model rule has also been amended to include these definitions.

In light of the above, the DAQ is recommending revisions be made to the Department's initial proposed HFC Regulation, specifically, to incorporate technical clarifications to the following terms, as requested by the Center for the Polyurethanes Industry, and as verified by the above referenced industry expert: Polyurethane; Flexible Polyurethane; Foam Blowing Agent; Integral Skin Polyurethane; Rigid Polyurethane Appliance Foam; Rigid Polyurethane Commercial Refrigeration and Sandwich Panels; Rigid Polyurethane High-Pressure Two-Component Spray Foam; Rigid Polyurethane Low-Pressure Two-Component Spray Foam; Rigid Polyurethane Marine Flotation Foam; Rigid Polyurethane One-Component Foam Sealants; and Rigid Polyurethane Slabstock and Other.

In addition to requesting the aforementioned definition modifications, ACC CPI further noted that, although they support the "sell-through" provision proposed in subsection 4.1.4 of the proposed regulation, the term "on site" may be too limiting and may not include factory uses of polyurethane systems. The Department agrees with the
removal of this term from the above referenced subsection.

As previously noted, a Summary Sheet of all revisions being proposed by DAQ during the post-hearing phase of this promulgation (the revisions to eleven definitions in Section 3.0, the revision of "on site" considerations as set forth in Subsection 4.1.4, and the revisions to the effective dates of prohibition in Section 6.0) is attached hereto as Attachment "E," for ease of reference. I concur with the recommended, non-substantive revisions, as they provide further clarification and a greater understanding of the proposed HFC Regulation for the benefit of the regulated community, for the reasons noted above.

Based on the Record developed by the Department's experts and established by the Hearing Officer's Report, I find that the Department has provided appropriate reasoning regarding the need for the revised proposed new regulation to be codified in the Delaware Administrative Code as follows: 7 DE Admin. Code 1151: Prohibitions on Use of Certain Hydrofluorocarbons in Specific End-Uses, and that the same is well-supported. I further find that the Department's experts fully developed the Record to support adoption of the revised proposed HFC Regulation, which establishes the prohibitions and requirements for the use and manufacture of HFCs in the State of Delaware, according to their specific end usage, which includes air conditioning and refrigeration equipment, aerosol propellants, and foam-end uses, and adopts specific EPA SNAP prohibitions. Moreover, the revised proposed new HFC Regulation is also designed to support GHG emission reductions in the State of Delaware and offers Delawareans an increasing quality of life through the reduction of air pollution, increased economic opportunities, and mitigation of the detrimental effects of climate change, as noted above.

Thus, for the reasons stated above, the recommendations of the Hearing Officer are hereby adopted, and I direct that the revised proposed HFC Regulation be promulgated as final.

In conclusion, the following reasons and conclusions are hereby entered:

1. The Department has the statutory basis and legal authority to act with regard to the revised proposed 7 DE Admin. Code 1151: Prohibitions on Use of Certain Hydrofluorocarbons in Specific End-Uses, pursuant to 7 Del.C. §§6001(c) and 6010, which authorize the Department to adopt rules to control air pollution as necessary to protect the public health, safety, and welfare;

2. The Department has jurisdiction under its statutory authority, pursuant to 7 Del.C. Chapter 60, to issue an Order adopting the revised proposed new HFC Regulation as final;

3. The Department provided adequate public notice of the proposed new HFC Regulation and all proceedings in a manner required by the law and regulations. The Department also provided the public with an adequate opportunity to comment on the proposed new HFC Regulation subsequent to the time of the public hearing (through May 31, 2020), in order to consider all public comment on the same before making any final decision;

4. Promulgation of the revised proposed new HFC Regulation, as set forth herein, will enable the Department to establish the prohibitions and requirements for the use and manufacture of HFCs in the State of Delaware, according to their specific end usage. Furthermore, the revised proposed new HFC Regulation supports GHG emission reductions in the State of Delaware and offers Delawareans an increasing quality of life through the reduction of air pollution, increased economic opportunities, and mitigation of the detrimental effects of climate change;

5. The Department has reviewed the revised proposed new HFC Regulation in the light of the Regulatory Flexibility Act, consistent with 29 Del.C. Ch. 104, and believes the same to be lawful, feasible, and desirable, that it will not establish reporting requirements or substantive additional costs for individuals or small businesses, and that the recommendations as proposed should be applicable to all Delaware individuals or small businesses equally;

6. Secretary's Order No.: 2021-WSS-0004
RE: Approving Final Regulatory Amendments to 7 DE Admin. Code 7201:
Regulations Governing the Control of Water Pollution, Part 2 -
Special Conditions for Stormwater Discharges from
Construction Activities

Date of Issuance: February 15, 2021
Effective Date of the Amendment: March 11, 2021

7201 Regulations Governing the Control of Water Pollution

Under the authority vested in the Secretary of the Department of Natural Resources and Environmental Control ("Department" or "DNREC"), pursuant to 7 Del.C. §§6006 and 6010, and all other relevant statutory authority, the following findings of fact based on the record, reasons and conclusions are entered as an Order of the Secretary in the above-referenced promulgation.

Background, Procedural History and Findings of Fact

This Order relates to the Department's proposed regulatory amendments to 7 DE Admin. Code 7201: Regulations Governing the Control of Water Pollution, Part 2 - Special Conditions for Stormwater Discharges from Construction Activities ("Amendments" or "Water Pollution Regulations"). This action is being taken by the Department at this time in order to support the development of a National Pollutant Discharge Elimination System ("NPDES") Construction General Permit ("CGP") by (1) removing existing conflicting regulatory language; (2) adding "effective" and "expiration" dates; (3) eliminating the post-rain event inspection requirement; (4) removing the "transfer of authorization" option; and (5) correcting existing clerical errors.

Areas that engage in construction activities that result in land disturbance equal to or greater than one (1.0) acre and that discharge stormwater to waters of the state are to be covered under the NPDES CGP. The CGP will provide permit coverage for a broad range of construction projects that meet the minimum land disturbance threshold, as defined by the federal CGP.

The NPDES CGP is being converted from a permit by regulation (that currently falls under the above noted Water Pollution Regulations), to a stand-alone general permit authorizing discharges from construction. Without the aforementioned proposed Amendments, there will be conflicts between the regulatory language currently existent in the Water Pollution Regulations and the newly effective CGP. The proposed Amendments will enable Delaware to maintain the enabling language for the CGP and eliminate conflicts for this and future CGPs in Delaware.
The purpose of the federal NPDES stormwater program is to control pollution generated from runoff associated with industrial activity, including construction, and municipal separate storm sewer systems. As noted above, an individual or general permit is required for all construction activity in the state of Delaware with a planned total disturbance of one (1.0) acre or greater, as well as activities that are less than one acre, but part of a larger common plan of development or sale where the total disturbance is greater than one acre.

Conditions of the CGP include compliance with the requirements of the approved sediment and stormwater management plan, as well as visual monitoring/inspections, recordkeeping, and reporting requirements. Sediment is the primary pollutant to be controlled from construction sites. The volume of stormwater discharge from construction sites varies and will depend on the size of the site, weather conditions, as well as other factors.

The Department has the statutory basis and legal authority to act with regard to the proposed Amendments and has the statutory authority for permit issuance of Delaware's CGP, through Section 402 of the federal Clean Water Act, as amended, 7 Del.C. Chapter 60, Section 6003, and the Memorandum of Agreement ("MOA") authorizing Delaware to implement the NPDES program.

The CGP is a state permit that is subject to both federal and state regulations. The Clean Water Act and federal regulations provide the federal permit requirements. The CGP shall be administered in accordance with the following state requirements:

- 7 Del.C. Ch. 60, Environmental Control;
- 7 Del.C. Ch. 40, Erosion and Sedimentation Control;
- 7 DE Admin. Code 7201, Section 9.2;
- 7 DE Admin. Code 5101, Sediment and Stormwater Regulations; and

Currently, Delaware's existing Water Pollution Regulations are not consistent with 40 CFR 122.46(a), as it has no issuance, effective, or expiration dates, and does not ensure that it is effective for a term not to exceed more than five (5) years. To address these deficiencies, the Department's Division of Watershed Stewardship, Sediment and Stormwater Program ("WSS-SSP"), has developed the Delaware CGP as a true general permit, rather than a permit by regulation.

The Department's proposed Amendments minimize duplication with the CGP and update administrative processes. The proposed CGP allows for closer alignment of construction stormwater discharge requirements with the United States Environmental Protection Agency ("EPA") and states such as Delaware that are located within EPA Region 3. The alignment of requirements is an important benefit to permittees who work in multiple jurisdictions, as it helps maintain understanding and compliance.

The CGP will expire after five (5) years, thus requiring a new permit to be reissued at that time. This is a benefit to the regulated community, as there is an opportunity to comment on changes to the CGP once every five years.

Insofar as anticipated impacts to Delegated Agencies, including DelDOT, the Department notes that there will be no anticipated impacts on the Delegated Agencies' abilities to implement the state's Sediment and Stormwater Program. When in the role of project owner, Delegated Agencies will see the same effects indicated above (i.e., improved alignment with federal and regional entities, reduced reporting requirement, and regular opportunities to provide comments during review and reissuance periods).

The Department published its proposed Amendments, along with the draft CGP, in the November 1, 2020 Delaware Register of Regulations. Public notice of the Department's proposed actions in this matter, as referenced above, were also published in both the News Journal and the Delaware State News on November 8, 2020. Interested persons were invited to submit their written comment on the draft permit and the proposed Amendments. Thereafter, the virtual public hearing regarding this matter was held on December 1, 2020.

Members of public attended the December 1, 2020 virtual public hearing, and verbal comment was received at that time. It should be noted that the verbal comments received during the public hearing pertained solely to the
Delaware CGP. No members of the public offered comment on the Department's proposed Amendments at the time of the hearing. Pursuant to 29 Del.C. §10118(a), the hearing record ("Record") remained open for fifteen (15) additional days subsequent to the date of the public hearing for receipt of public comment. The Record formally closed with regard to public comment at close of business on December 16, 2020, with additional written comments being received from the public by the Department during the post-hearing phase of this promulgation. It should be noted that all notification and noticing requirements concerning this matter were met by the Department. Proper notice of the hearing was provided as required by law.

Subsequent to the close of the Record, the Department's Division of WSS-SSP staff prepared a Technical Response Memorandum ("TRM"), which responded to the comments received from the public concerning the Department's proposed Amendments. The TRM also incorporated a CGP Fact Sheet that provides a very detailed description of the CGP permit development performed by the Department and offers the requisite reasoning as to why a general permit for constructive activities is the appropriate approach for the Department to take in this matter.

The Department's presiding hearing officer, Lisa A. Vest, prepared a Hearing Officer's Report dated February 8, 2021 ("Report"), which expressly incorporated the Department's proposed Amendments, along with the aforementioned TRM (with attachment) and draft CGP, into the Record generated in this matter. The Report documents the proper completion of the required regulatory amendment process, establishes the Record, and recommends the adoption of the Department's proposed Amendments as attached to the Report as Appendix "A."

Reasons and Conclusions

The Department is proposing the aforementioned Amendments to Delaware's existing Water Pollution Regulations to support the development of the NPDES CGP by removing existing conflicting regulatory language, adding "effective" and "expiration" dates, eliminating the post-rain event inspection requirement, removing the "transfer of authorization" option, and correcting existing clerical errors. As noted above, the Amendments support the development of a stand-alone CGP, which will be required for all construction activity in Delaware with a planned total disturbance of one (1.0) acre or greater, as well as activities that are less than one acre but part of a larger common plan of development or sale where the total disturbance is greater than one acre. The CGP will provide permit coverage for a broad range of construction projects that meet the minimum land disturbance threshold, as defined by the federal CGP.

All comments received by the Department in this matter were fully responded to in the aforementioned TRM of January 20, 2021. It should be noted that no changes were made to the proposed Amendments subsequent to the public hearing held on December 1, 2020. Revisions were made to the draft CGP prior to its finalization, in response to the public comments received in this matter, in order to correct prior error, and to provide greater clarity to the regulated community within that document.

Based on the Record developed by the Department's experts and established by the Hearing Officer's Report, I find that the proposed regulatory amendments to 7 DE Admin. Code 7201: Regulations Governing the Control of Water Pollution, Part 2 - Special Conditions for Stormwater Discharges from Construction Activities, are well-supported. I further find that the Department's experts fully developed the Record to support adoption of these proposed Amendments. Therefore, the recommendations of the Hearing Officer are hereby adopted, and I direct that the proposed Amendments be promulgated as final.

In conclusion, the following reasons and conclusions are hereby entered:

1. The Department has the statutory basis and legal authority to act with regard to the proposed amendments to 7 DE Admin. Code 7201: Regulations Governing the Control of Water Pollution, Part 2 - Special Conditions for Stormwater Discharges from Construction Activities;

2. The Department has jurisdiction under its statutory authority, pursuant to 7 Del.C. Ch. 60, to issue an Order adopting these proposed Amendments as final;
3. The Department provided adequate public notice of the proposed Amendments, and all proceedings in a manner required by the law and regulations. The Department also provided the public with an adequate opportunity to comment on the proposed Amendments, including at the time of the virtual public hearing held on December 1, 2020, and during the 15 days subsequent to the hearing (through December 16, 2020), in order to consider all public comment on the same before making any final decision;

4. Promulgation of the proposed Amendments to 7 DE Admin. Code 7 201: Regulations Governing the Control of Water Pollution, Part 2 - Special Conditions for Stormwater Discharges from Construction Activities, will enable Delaware to control pollution generated from runoff associated with construction activity that is considered a subset of industrial activity. Furthermore, the aforementioned Amendments will support the Department's development of the NPDES CGP by (1) removing existing conflicting regulatory language; (2) adding "effective" and "expiration" dates; (3) eliminating the post-rain event inspection requirement; (4) removing the "transfer of authorization" option; and (5) correcting existing clerical errors;

5. The Department has reviewed the proposed Amendments in the light of the Regulatory Flexibility Act, consistent with 29 Del.C. Ch. 104, and believes the same to be lawful, feasible, and desirable, and that the recommendations as proposed should be applicable to all Delaware citizens equally;

6. The Department's Hearing Officer's Report, including its established Record and the recommended proposed Amendments as set forth therein in Appendix "A," are hereby adopted to provide additional reasons and findings for this Order;

7. The Department's proposed Amendments, as published in the November 1, 2020 Delaware Register of Regulations, and as set forth in Appendix "A" as noted above, are adequately supported, are not arbitrary or capricious, and are consistent with the applicable laws and regulations. Consequently, they are approved as final regulatory Amendments, and shall go into effect ten days after their publication in the next available issue of the Delaware Register of Regulations;

8. The Department has an adequate Record for its decision, and no further public hearing is appropriate or necessary; and

9. The Department shall submit this Order approving as final the proposed Amendments to the Delaware Register of Regulations for publication in its next available issue and provide such other notice as the law and regulation require, as the Department determines is appropriate.

1900 Board of Nursing

The Delaware Board of Nursing pursuant to 24 Del. C. § 1906(a)(1), proposed to revise its regulations. The proposed amendments seek to add failing to practice nursing without discrimination to the list of examples of unprofessional conduct.

SUMMARY OF THE EVIDENCE AND INFORMATION SUBMITTED

Following publication in the Delaware Register of Regulations on October 1, 2020 a public hearing was held on November 18, 2020. Written comment periods were held open for thirty days, and an additional fifteen days following the public hearing. At the hearing, the Board accepted as evidence and marked as the Board’s Exhibits 1 and 2 documentation of publication of the notice of the public hearing in the News Journal and the Delaware State News. On December 2, 2020, Nemours Children’s Health System (Nemours) submitted written public comment.

At the time of the deliberations, the Board considered the following documents:

- Board Exhibit 1 – Affidavit of publication of the public hearing notice in the News Journal;
- Board Exhibit 2 – Affidavit of publication of the public hearing notice in the Delaware State News;
- Board Exhibit 3 – December 2, 2020 letter from Nemours Children’s Health System offering support for the regulation in general but requesting the Board add “gender identity and expression” to the proposed regulation.

There was no verbal testimony given at the public hearing on November 18, 2020, and no written comments were received by the Board during the initial thirty-day public comment period. Following the hearing, Nemours Children’s Health System submitted written public comment requesting the Board add “gender identity and expression” to the language of proposed regulation.

FINDINGS OF FACT AND CONCLUSIONS

1. The public was given notice and an opportunity to provide the Board with comments in writing and by testimony at the public hearing on the proposed amendments to the Board’s regulations.
2. There were no public comments provided to the Board during the initial 30 day written public comment period, or the public hearing.
3. On December 2, 2020, Nemours Children’s Health System submitted written public comment requesting the Board add “gender identity and expression” to the language of proposed regulation.
4. On February 10, 2021, the Board deliberated on the proposed regulation, including the written public comment submitted by Nemours. The Board acknowledged the importance of recognizing all patient populations, including those most vulnerable to discrimination, and agreed with the suggestion from Nemours to include “gender identity and expression” in the proposed regulation. The Board noted that the same language pertaining to discrimination is included in Regulation 7.3.1.7, so it would be appropriate to add “gender identity and expression” there as well. Insofar as adding the proposed language would be a substantive change, the Board voted to move forward with the regulation as proposed but add the language suggested by Nemours immediately thereafter. The Board currently has additional regulation changes it intends to propose so will include “gender identity and expression” in those.
5. Pursuant to 24 Del. C. § 1906(a)(1), the Board has statutory authority to promulgate rules and regulations clarifying specific statutory sections of its statute.
6. The proposed amendments seek to add failing to practice nursing without discrimination to the list of examples of unprofessional conduct.
7. The public was given notice and an opportunity to provide the Board with comments in writing and by
testimony at the public hearing on the proposed changes to the Board’s rules and regulations.

8. For the reasons stated above, the Board will move forward with the regulation as proposed but include the language suggested by Nemours in the next proposed regulatory change.

**DECISION AND ORDER CONCERNING THE REGULATIONS**

Having found that the proposed changes to the regulations are necessary as outlined herein, the Board finds that the regulations shall be adopted as final in the form as proposed. The exact text of the regulations, as amended, are attached to this order as Exhibit A. These changes will become effective ten days following publication of this order in the Delaware Register of Regulations.

**IT IS SO ORDERED** this 10th day of February 2021 by the Delaware Board of Nursing.
