REGULATORY IMPLEMENTING ORDER

101 DELACARE: Regulations for Early Care and Education and School-Age Centers

I. SUMMARY OF THE EVIDENCE AND INFORMATION SUBMITTED

Pursuant to 29 **Del.C.** §9003(a)(7) and 14 **Del.C.** §§3001A-3005A, the Secretary of Education wishes to transfer 9 **DE Admin. Code** DELACARE: 101 Regulations for Early Care and Education and School-Age Centers to 14 **DE Admin. Code** 933 Regulations for Early Care and Education and School-Age Centers. This amended regulation is being transferred from 9 **DE Admin. Code** 101 to 14 **DE Admin. Code** 933 in order to provide clarity regarding the movement of the Office of Child Care Licensing (OCCL) from the Department of Services for Children, Youth and Their Families to the Department of Education on July 1, 2020. The regulation is also being edited to comply with the *Delaware Administrative Code Drafting and Style Manual*.

This amended regulation includes the following changes:

- Due to legislative change, OCCL is moving from the Department of Services for Children, Youth and Their Families to the Department of Education on July 1, 2020. Therefore, the definition of department was changed as well as references to the division director and the division's role;
- References to Title 31 were stricken and replaced with Title 14;
- To comply with the Childhood Lead Poisoning Prevention Act, proof of a blood lead test was added as a required component for each child's health appraisal when enrolled;
- For clarification, to comply with guidance provided by the Division of Public Health, the radon testing requirements were revised to state that testing must be performed in each room used for child care;
- For clarification, radon testing requirements and mitigation if necessary were added to the relocation procedures;
- To clarify inconsistent requirements regarding whether an appeal of an enforcement action could be made verbally or in writing, the test was revised to allow for verbal requests for appeals of warning of probation or probation and to require written requests for all other appeal requests;
- Due to travel distance that may be required by licensing specialists, the 9AM delivery deadline for suspension orders was changed to 11AM;
- For clarification, the language was revised to include the requirement for the phone to be on-site at the center;
- For clarification, all the policies and procedures required for the employee handbook were grouped together;
- For clarification, text was added to ensure that the licensee is aware that participation in supervised experience must be approved by OCCL in advance;
- Substitutes who work less than 25 hours per week are exempt from annual training requirements and from having a professional development plan;
- For clarification, language was added that files for volunteers must be on-site;
- Clarification was added that school-age only programs operating in public schools are exempt from lead-risk assessments;
- For clarification, the text was revised regarding the differences between being trained and being certified in the administration of medication;
- In regard to the outdoor fencing requirement, language was added to clarify that a gate must move freely when opened and not be hindered by scraping the ground;
- The administration of medication self-training guide was revised to clarify regarding whether to administer the medication first or to call 9-1-1; and
- Typographical errors were corrected.

Notice of the proposed regulation was published in the *Delaware Register of Regulations* on July 1, 2020. In addition, notice was published in *The News Journal* and the *Delaware State News* on July 1, 2020, in the form hereto attached as *Exhibit "A"*. Comments were received which were pertinent to the proposed amendments suggested the Department consider:

(1) The requirement to have a blood lead test for each child's health appraisal when enrolled, parents having to request this test, and the age at which it is required.

Agency Response: The Childhood Lead Poisoning Prevention Act requires children ages 12 months and older to have their blood lead level tested before enrolling into child care. This is a critical step to prevent young children who may

be living in environments with lead hazards from repeatedly being exposed which increases the chances of harm to their development. OCCL is required to enforce this law to ensure the health, safety, and well-being of children in care. Subsection 41.1.5 will be revised to state, "Proof of blood lead level for children ages 12 months and older."

(2) That school-age only programs operating in public schools are exempt from lead-risk assessments.

Agency Response: After further consideration and to ensure the safety of all children in licensed child care sites, school-age programs located within public schools will be required to have a lead-risk assessment if the building was built before 1978. Early childhood programs located within public schools are required to have lead-risk assessments. The exemptions from lead-risk assessments for school-age only programs were stricken from Section 86.0 and subsection 45.2.4.

(3) The suggested time for radon testing being every two years as the Environmental Protection Agency suggests instead of the current five year testing cycle.

Agency Response: Delaware's Division of Public Health (DPH) recommends radon testing every five years, and since this is a state regulation, we adhere to state guidance. This section will remain as written.

(4) Center programs have to follow more strict guidelines than early childhood programs and public schools regarding lead risk assessments and radon testing.

Agency Response: There is no requirement for annual lead-risk assessments or radon testing. Radon testing is required every five years and after renovating the property. Radon testing is required for early childhood programs operating in a public school and the exemption from radon testing for school-age only programs was removed from Section 86.0.

(5) Pediatricians offices do not routinely ordering blood tests even though it is something that OCCL requires.

Agency Response: OCCL does not have the authority to regulate doctor's offices.

(6) The timeframe for when the blood lead level will be required and it being something additional parents will need to request from their doctor.

Agency Response: Currently, the lead blood level test is not required. This is a new requirement based on the Childhood Lead Poisoning Prevention Act that was passed in May 2019. OCCL will delay the enforcement of this requirement until December 1, 2021 due to the COVID-19 pandemic.

(7) That clarification is needed around "supervised experience."

Agency Response: Supervised experience reduces the amount of experience needed for many child care positions in order to help people become qualified more quickly so they can work independently in the classroom. This does not need to be added in the regulation.

(8) Section 67.0 being worded as it is inferred that school buses may no longer be used.

Agency Response: Section 67.0 has been revised for clarification to state, "Use of a vehicle, other than a school bus, with a rated capacity as defined by the manufacturer, to carry more than 10 passengers in addition to the driver to transport children is prohibited." After further review of Section 67.0 it was determined that the section needed to be rearranged to take into consideration the differences in requirements between staff members who are employed or volunteer at a center versus when the center contracts with a company to provide transportation. These changes were made in the regulation.

(9) That the Child Care Development Block Grant Act (CCDBG) should not be in the regulation and federal law should be cited instead.

Agency Response: Using the CCDBG informs the public where the specific requirements regarding background checks may be located. This subsection will remain as written.

(10) That reference to illicit drug should be removed from the regulation.

Agency Response: This statement helps communicate the need for a drug and alcohol free environment and for the employee to acknowledge that they are aware of the requirement. This subsection will remain as written.

(11) That "start date" be removed in subsection 30.1.9 and insert "before being left alone with children" be inserted.

Agency Response: The CCDBG requires fingerprinting before staff begin working at the center. The current modifications of this requirement are due to the COVID-19 health crisis and the inability to get a fingerprinting appointment promptly. This subsection will remain as written.

(12) That Health Insurance Portability and Accountability Act (HIPAA) rules nullify parts of this regulation (referencing subsection 30.1.12).

Agency Response: HIPAA refers to the transfer and storage of electronic protected health records and does not impact this regulation. Ensuring that a staff member is physically able to perform his or her job functions is critical to protecting the health, safety, and well-being of children. This subsection will remain as written.

(13) That in subsection 30.1.15 the words "initial and annual" be removed as this is excessive.

Agency Response: Reviewing the recognition and reporting procedures of child abuse and neglect initially and annually ensures staff members are aware of the requirements and reminds them they are required to report suspected child abuse or neglect. Due to the frequency of contact with children, it is vital that child care workers understand that they are required by law to report suspected abuse or neglect. In addition, the CCDBG requires this training. This subsection will remain as written.

(14) That in subsection 31.1.16 the word "annual" be removed as it believed to be excessive.

Agency Response: Failing to follow safe sleep practices is cited regularly as a noncompliance and annual training for

the actively involved owner helps ensure the owner understands the requirements to provide guidance for the rest of the staff members. This subsection will remain as written.

(15) That the proposed language in Section 36.0 be removed as it is a redundant and unnecessary mandate requiring extra time.

Agency Response: This was added to lessen the likelihood of altered records and ensure correct staff-to-child ratios are maintained throughout the day. This subsection will be revised by removing the word “entered” and replacing it with the word “documented”.

(16) That subsections 38.1.3.1 and 38.1.3.2 be removed regarding the requirement of logs to be kept as it is unnecessary, time consuming, and redundant. Forms are already part of child file which must be shown to licensing.

Agency Response: The requirement to provide a log to OCCL is to ensure that child care providers are providing the Parents Right To Know to children who may be enrolled in a center in order for parents to be aware of the history of the child care facility before placing a child in care. This subsection will remain as written. However, numbering (38.1.3.3) has been added per the *Delaware Administrative Code Drafting and Style Manual*, to the last sentence “Once a log is provided to OCCL, a licensee is not required to keep that log on file at the center.”

(17) That the proposed change to subsection 40.1.2 implies two parents and two guardians.

Agency Response: This text was revised to comply with the drafting manual of the *Register of Regulations*. OCCL will accept one or two parents depending on the family’s situation. This subsection will remain as written.

(18) That subsection 40.1.3 be changed as it is not always possible to list two people as emergency contacts.

Agency Response: The requirement of having emergency contact information for two people which may include the parent or parents is necessary in case the parent cannot be reached. This subsection will be revised for clarification to state, “Names and emergency phone numbers for at least two people approved to pick up the child (may include child’s parent or guardian).”

(19) That subsection 40.1.9 be changed to remove the words “If provided by parent,” as this terminology makes the requirement moot.

Agency Response: This subsection will be changed to state, “If applicable, a statement of the child’s medical, developmental, or educational special needs including, but not limited to: copies of an IEP, IFSP, and Section 504 plan and information on allergies, current illnesses or injuries, previous serious illnesses or injuries, and needed medications;”

(20) That subsection 40.2 be amended to remove “without written permission unless” as beyond parental permission the state needs a subpoena or warrant.

Agency Response: The state does not need a warrant or subpoena to obtain information to conduct child abuse or neglect investigations. OCCL regularly conducts investigations and may need information to contact a parent or guardian and regularly reviews information contained within a child’s file. This subsection will remain as written.

(21) That subsection 41.2 be clarified as the current language suggests that an additional health exam report is required the next year if a child’s birthday is before September.

Agency Response: According to this regulation, health appraisals are valid for 13 months. If a child turns 5 during the year that he or she enters kindergarten, a new appraisal is not required until the previous one expires. This subsection will remain as written.

(22) That subsection 41.3 be clarified as it currently implies the licensee must enroll children who are not immunized.

Agency Response: This regulation allows for an exemption from the immunization requirement for centers to be able to enroll non-immunized children. It does not require the center to enroll a child without immunizations. This subsection will remain as written.

(23) That the words “for more than one day” be added to subsection 48.5.4.3 regarding notification to OCCL when a center loses electricity and the center closes early.

Agency Response: OCCL needs to be informed when the temperature cannot be maintained to ensure that the center works to restore the proper temperature in a timely manner and to address complaints that are reported by parents and guardians. In addition, section 14 requires notification to OCCL of equipment breakdown. This subsection will remain as written.

(24) That subsection 63.1 be clarified regarding written parental approval for emergency medications.

Agency Response: All medication requires written parent approval on a completed medication administration record. This section requires that someone who is medication certified is present in case a child has an allergic reaction or needs some other known approved emergency medication. This provides an extra level protection for children. This subsection will remain as written.

(25) That subsection 63.7 be clarified to deem who is responsible if a child does not self-administer medical care appropriately.

Agency Response: The licensee is required to monitor the self-administration of medication and document it. In addition, the child’s health care provider is required to ensure the child is able to self-administer the medication. In addition, the licensee may put a waiver of liability on non-intravenous injections in place to allow the self-administration of medication. This subsection will remain as written.

(26) That subsection 63.8 regarding administration of medication is not in the purview of the Office of Child Care Licensing and should not be in the regulation.

Agency Response: OCCL is required to ensure that child care centers follow applicable federal and state laws and are cited for non-compliance when laws are violated. This subsection will remain as written.

(27) That Section 74.0 is too specific, and do not allow for alternative early care; and that “accepted practices” are not accepted by all.

Agency Response: OCCL has not received any complaints from child care centers regarding their inability to have an alternative program using these parameters. This section will remain as written.

(28) That wording “at least 4 activities each day” in subsection 74.1.3 is excessive.

Agency Response: Including four activities each day helps keep children engaged and provides learning opportunities throughout the day. This section will remain as written.

(29) That subsection 74.2 is excessive in terms of required early care lesson plans.

Agency Response: Providing weekly opportunities for children provides children with new experiences which are an important part of development. This section will remain as written.

(30) That reference to “daily opportunities” is meaningless, redundant and not the appropriate word to use.

Agency Response: Requiring the activity areas to be included provides information to parents on the types of activities a child is provided with throughout the day. This also helps staff understand the how the classroom is to be set up. This section will remain as written.

Lastly, the Department added the word “the” in subsection 13.3.4 for readability.
